

The following is a summary of the ANA membership as of February 2010, after the upgrade of the electronic membership system of SCB. We currently have 560 official members.

Figure 1 summarizes the general location of residence of the ANA members. Approximately two-thirds (369 members) of the ANA membership lists their country of residence as the United States of America. Another 119 (21%) lives within Latin America and the remaining 13% is scattered around the world. Membership numbers are lower than a year ago. Presumably part of this is due to the general decline in formal SCB membership due to the problems of electronic membership system. The table at the end of this document has the full data.

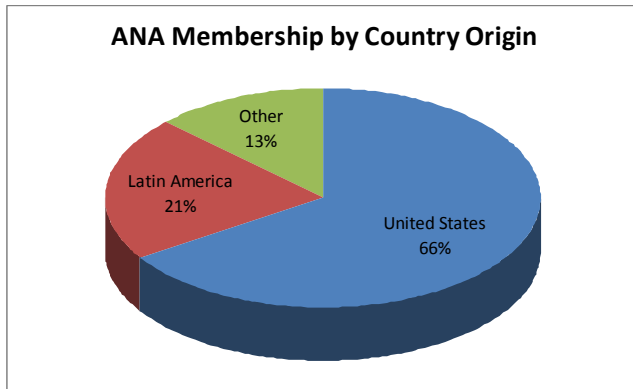

Figure 1. Distribution of ANA members by region.

Figure 2 shows the distribution of members within Latin America (i.e., Americas w/o USA and Canada). The range of countries is broad, but many countries have no representation in ANA. Five countries have only one member. There is an apparent need to increase the formal representation of people actually living in Latin America.
