

JOSÉ EDUARDO PONCE GUEVARA **CURRICULUM VITAE**

Ecology and Conservation of Wildlife

Instituto de Ecología, U.N.A.M.

**Circuito Exterior s/n junto al Jardín Botánico / Inst. de Biología
04510 Ciudad Universitaria, D. F.**

BIOGRAPHY

Eduardo did his BA in Biology at the Querétaro State University, Mexico. His first projects in 2003 were focused biodiversity assessment to determine the feasibility of human developments. Later, Eduardo participated on more specific research projects related with carnivore ecology and their role on the ecosystem in the Sonora mountains. However, Eduardo focused his efforts in the grassland region located at northwestern Chihuahua, Mexico, since 2006 on where he have participated in several projects, but also has been the principal investigator in some others related with the ecology of arid grasslands specifically working with black-tailed prairie dogs, North American porcupine, black-footed ferret, and American bison. During all this time Eduardo realized the intense human-wildlife conflicts as apparent competitors for the natural resources. This took Eduardo to think more about these human – environment conflicts, and nowadays he is focusing his PhD in understand, confront and provide solutions to this conflicts.

Throughout his professional development he has made a great effort to link social development in basic research to solving environmental problems. Based on this information, he started studies and actions to reduce and revert the habitat degradation by changing the dominant economic activities (i.e. cattle ranching and agriculture). While at an experimental scale, the implications of their work could change the paradigm on how conservation has been done in Mexico, by using the economic forces behind ecosystem decline as the agents of restoration. Since 2006 Eduardo has contributed with more than \$ 30,000 dollars to develop their research on conservation. His academic development was recognized and he was nominated for the Youth Rolex Awards for

Enterprise in 2010 and has been part of the experimented equipment awarded by The Whittle Fund for Nature Award in 2010 and 2011.

Currently, his work is having a major impact on the definition and implementation of environmental policies in the Janos Biosphere Reserve that is already considered as an example to improve the designation and management on natural protected areas in the country. A significant proportion of his research has been devoted to address issues related to the conservation of biological diversity as: mammal ecology in the arid environments and their implications for conservation, the key role of prairie dogs in the conservation of grasslands in North America, the economy of natural resources, and the economic tools for conservation

ACADEMIC DEVELOPMENT

- 2010 to present – PhD student at Ecology Institute, UNAM with the project: Managing prairie dogs, domestic cattle, and honey mesquite; Implications for grassland conservation.
- November 2013 – Academic Writing and Oral presentations Course. Universidad Nacional Autónoma de México.
- June-July 2013 - Environmental Leadership Program. International Course at University of California, Berkeley.
- August 2012 – Economic Tools for Conservation. International course at Stanford University, CA, USA.
- 2012 – Environmental and Economic Valuation at Economy Faculty in UNAM
- 2011 – Economy of Natural Resources course at Economics Faculty in UNAM
- 1999-2004 BA in Biology at Natural Sciences Faculty in Queretaro State University

PROFESIONAL EXPERIENCE

- 2014. Coordinator. Herramientas Económicas para la Conservación de la Naturaleza, México
- 2014. Conservation Strategy Fund - UNAM

- 2014. Coordinator. Conservación del perro llanero de Cola negra en Sonora y Chihuahua. Programa de acción para la conservación de especies en riesgo (PROCER) CONANP-UNAM
- 2013 - Coordinator. Restauración y conservación de los pastizales áridos en el noroeste de México. Alianza WWF – Fundación Carlos Slim.
- 2013. Coordinator. Large-scale restoration and conservation of the prairie dog grasslands in Janos, Mexico. Whitley Fund for Nature.
- 2009 – Member of the Scientific Board in the Janos Biosphere Reserve.
- 2010 – 2014 Teaching assistant. Conservation Biology Course, Ecology Institute, U.N.A.M.
- 2006 – 2009. Principal researcher on the project “Habitat use of North American porcupine (*Erethizon dorsatum*) at the limits of its distribution”. Janos, Chihuahua. 2006 to present.
- 2005 – 2009. Field technician in the project The Wild Bison (*Bison bison*) from Chihuahua, Mexico: Issues on Conservation and Historic distribution ”. Janos Chihuahua.
- 2006 - Consultant in the project Black-footed ferret (*Mustela nigripes*) reintroduction in Janos, Chihuahua.
- 2004 – 2005. Field coordinator in the project Ecology and conservation of jaguar (*Panthera onca*) in Sonora, The Northern Jaguar Project.
- 2002 – 2004. Consultant in the project Ecology and management of carnivores in the Sierra de San Luis mountains, Sonora México. Universidad Autónoma de Querétaro.
- Consultant in the project Analysis of the mammal community in the state of Nayarit. 2003

SCIENTIFIC PRODUCTION

NOMINATIONS AND GRANTS

- Student grant from National Council of Science and Technology. 2010 to present
- Nomination to Youth Rolex Awards for Enterprise 2010
- T & E Inc. Grant for Conservation Biology Research Program. 2006-2008
