Keywords: Nature Restoration, Pesticides, Policy, agriculture, farmers, fisheries, protected areas

Abstract

1) To halt biodiversity loss, mitigate global warming, and maintain long-term viability of rural and urban areas, timely action is required. Environmental pressures need to be reduced and nature’s capacity to recover and deliver life-support services must be restored. The Sustainable Use Regulation of plant protection products (SUR) and the Nature Restoration Law (NRL), proposed by the European Commission in June 2022 as cornerstones of the Green Deal, can serve as important elements in reaching these targets.

2) Both legal proposals are facing strong resistance and criticism on the grounds of adverse effects on farming, fisheries, forestry and society at large. Yet many specific claims contradict scientific evidence as we show in this paper.

3) Evidence shows that restoring nature and reducing the use of agrochemicals...

1. is essential for maintaining long-term production capacity and enhancing food security;
2. can help generating new employment opportunities and stimulate innovation;
3. serves an investment with high return rate and multiple beneficiaries across society, and
4. can foster a transition to sustainable production and consumption models.

4) We further demonstrate that

5. establishing marine protected areas is an effective approach to sustain and possibly even boost fisheries;
6. by reducing Europe’s overproduction and overconsumption, especially with regards to animal-based food and 1st-generation biofuels, Europe can contribute to food security;
7. protecting and restoring carbon-rich forests serves as a much more cost-efficient way of mitigating climate change compared to burning biomass, and without the losses of biodiversity and other ecosystem services caused by the latter.

5) Societal and political debates are essential instruments in democratic societies, and a valuable means to drive societal transitions. Such transitions are urgently needed in this era of multiple environmental and socio-economic crises. To this end, > 6,100 signatories to this document are welcoming, and keen to support, an evidence-based dialogue at the EU level and within the Member States.

Introduction
We are currently facing a series of global crises, many of which are directly generated by anthropogenic pressures on the Earth’s systems. Having surpassed several Planetary Boundaries (Persson et al., 2022; Rockström et al., 2009) timely actions are needed. Halting biodiversity loss, mitigating global warming, and maintaining long-term agricultural productivity, require on the one hand reducing the environmental pressures driving these crises, and on the other hand, restoring nature’s capacity to recover and deliver life-support services.

Within the European Union (EU), the state of nature is mostly in poor condition. In the EU-27, 14.2% of the land area is protected as ‘Sites of Community Importance (SCI)’ under the Habitat Directive (European Environment Agency, 2019), but 81% of these habitats are in either "unfavourable-insufficient” or "unfavourable-poor” condition, with ongoing deterioration trends in most habitats (European Environment Agency, 2020).

The European Green Deal (European Commission, 2019) responds to these crises, alongside the challenges they pose to nature and society from an EU perspective. The Green Deal provides an ambitious long-term strategy to protect and enhance the EU’s natural capital, and shows global leadership in making Europe the first climate-neutral continent by 2050. The Green Deal acknowledges that climate change, biodiversity, health, and food security are intrinsically linked. It is also a mechanism to operationalise the United Nation’s 2030 Agenda and the Sustainable Development Goals within the EU. Three of the Green Deal’s pillars are (1) preserving and restoring ecosystems and biodiversity, as reflected in the EU Biodiversity Strategy for 2030 (European Commission, 2020a); (2) developing a fair, healthy and environmentally friendly food system, represented in the Farm to Fork Strategy (European Commission, 2020b); and (3) reaching zero pollution and a toxic-free environment (European Commission, 2021).

As part of the Green Deal, the Nature Restoration Law (NRL; European Commission, 2022c) is an important building block of the EU’s Biodiversity Strategy for 2030 (European Commission, 2022a). It addresses the weaknesses of the former EU Biodiversity Strategy for 2020. Current evidence suggests that the present policy framework - mostly based on soft/voluntary measures and a focus on protection - is insufficient to bend the curve of biodiversity loss and ecosystems’ degradation (European Environment Agency, 2020; Rigal et al., 2023) or to ensure sustainability in using natural resources (European Commission, 2016). Complementing the existing environmental legislation and some sectoral policies (e.g. agriculture, fisheries), the NRL is the first legally binding instrument to emerge from the EU Biodiversity Strategy. It includes quantitative targets, timelines, wide geographical coverage and implementation details (e.g., indicators, habitat types) to track progress. Specific aims are
to establish effective, area-based restoration measures on at least 20% of the EU’s land and sea areas by 2030 and all ecosystems in need of restoration by 2050. It further sets targets on ensuring the resilience of food systems (agricultural and fisheries).

The second proposal currently on the table is for a Sustainable Use Regulation of plant protection products (SUR; European Commission, 2022d). The EU Biodiversity Strategy for 2030, the Farm to Fork Strategy and the Zero Pollution Action Plan already include targets to reduce by 50% the overall use and risk from chemical pesticides and to reduce by 50% the use of more hazardous pesticides by 2030 at EU level. However, these targets lack specific mechanisms and are not legally binding. The SUR would require Member States to adopt and implement national targets toward 2030, compared to 2015-2017 as baseline years. Other objectives of the SUR proposal are to: i) increase the application and enforcement of integrated pest management as well as the use of less hazardous and non-chemical alternatives to chemical pesticides, ii) improve the availability of monitoring data on pesticides, health and environment, iii) enhance the implementation, application and enforcement of legal provisions across all Member States to improve policy effectiveness and efficiency, and iv) promote the adoption of new technologies toward these goals.

Critique and resistance to the new regulations
The aforementioned crises have also triggered critical discussions about the NRL and the SUR. Various societal actors and policymakers argue that these pieces of legislation are obstacles for the swift recovery of European economies from recent crises such as the Covid-19 pandemic, the slowing of economic growth, and the inflation following the invasion of Ukraine by Russia and the sanctions by the EU against Russia. Opponents of the proposed regulations argue that they will have adverse effects on farmers, fishers, and society at large, by threatening food security, taking away jobs and competing with the transition to renewable energy.

Members of the scientific community are deeply concerned about the ongoing discussions and negotiations on these two legislative proposals, especially as many of the criticisms levelled at the SUR and NRL are not only unsupported by scientific evidence, but stand in stark contrast to it. In the following, we analyse eight specific claims and explain how the scientific evidence disproves them.

In addressing these claims, we aim at facilitating a democratic, evidence-based decision-making process, in the interest of society at large. Accordingly, in this paper we do not assess the NRL or SUR or their details, nor do we make explicit policy proposals. Rather, we call for policymakers to act responsibly by taking well-informed decisions, building on a plethora of available knowledge and collaborating with the scientific community from multiple disciplines.

Key claims and their scientific counter-arguments

**Claim 1 by opponents of the SUR and NRL: The new regulations will reduce yields and overall agricultural production, posing a threat to food security.**

*Scientific evidence: Protecting and restoring nature, as well as reducing risks from agrochemicals, are essential for maintaining long-term agricultural production and enhancing food security.*

Restoring natural areas on agricultural lands under NRL and reductions in the use of plant protection products under SUR will indeed likely lead to production declines on local or regional scales, and in the short term. However, the exact impacts are impossible to quantify because they would depend on the implementation approaches nationally, regionally, as well as by crops and land types. For example, targeting nature restoration to least productive areas or degraded areas (including with severe
soil compaction and erosion, or with the forecasted water deficit) will minimise the actual impact. Similarly, it has been estimated that the use of pesticides could be reduced by more than 40% without negative effects on food productivity in most farms (Lechenet et al., 2017). A recent report reviewing the effects of nature restoration measures on food productivity indicated numerous practices that can enhance yields and prevent soil degradation (Liquete et al., 2022, Castle et al. 2019). Furthermore, studies assessing the impacts of the SUR are strongly weakened by simplifying assumptions and the specific model-framework, as they do not consider the disruptive nature of transformation policies and the adaptation capacities of farms (Candel 2022)

Both SUR and NRL can contribute to adopting solutions for ecologically resilient food production and focusing on addressing the underlying causes of food security. Local-level losses can be avoided through locally-adapted farming practices and, if they occur, can be financially compensated. Integrated Pest Management and related approaches (De Guine et al., 2021), adoption of novel technologies such as smart farming (Finger, 2023; Rajmis et al., 2022) or data-based crop insurances (Mohring et al. 2020) need much better and wide implementation support across Europe. The SUR obligations can become a key mechanism to trigger such transition.

There is substantial evidence from Europe pointing out that a key to the supply of multiple ecosystem services in agricultural landscapes is to maintain diverse landscapes (Pe’er et al. 2022; Le Provost et al. 2023). Ecosystem restoration (especially of high-carbon ecosystems), alongside the prevention of their degradation, has the largest potential for both mitigating climate change and protecting biodiversity (IPBES-IPCC 2021). Evidence is mounting that cost-effective means for flood protection and water retention can be achieved by restoring floodlands, wetlands or forests in water catchments (Turkelboom et al. 2021; Mehl et al. 2018; Dixon et al. 2015; Le Coent et al. 2021). The negative impacts of global warming on crop production (and vice versa) can be mitigated by increasing functional diversity in agricultural landscapes (Tscharntke et al., 2012 and references therein). Protection and restoration of non-cropped areas within farmlands simultaneously counter the risk of crop losses and biodiversity declines. (Semi-)natural landscape features and vegetation cover stabilise the microclimate, support pest control and pollination, reduce soil erosion, increase habitat heterogeneity, and improve water quantity and quality (e.g. Petit & Landis, 2023).

Finally, the biggest risks to food security currently originate not from the removal of land from agricultural production, but from climate change (Pörtner et al. 2021), soil and landscape degradation (Pandit et al. 2018), losses of biodiversity and associated ecosystem services (IPBES 2019; FAO, ITPS, GSBI, SCBD, and EC 2020), as well as their combined effects (Seppelt et al. 2020). A high share of soil (61%) within the EU is affected by degradation (JRC, 2023). Droughts For example, droughts have decreased the total 2022–23 EU cereal production by 6.9% compared to the 5-year average, and maize production is projected to decrease by 24.3% (European Commission, 2023). Past drought events 2018-20 have created yield losses across Europe of historical dimensions (Rakovc et al., 2022). Even with irrigation, yield declines are expected for most crops in Europe (European Environment Agency, 2019). Climate change also increases the severity of pest infestations (Lenton et al. 2019). Some 50% of land cultivated with pollinator-dependent crops face a deficit in pollinators (European Commission, 2022), which are under multiple pressures from pesticides, habitat destruction and climate change. Likewise, more than 60% of EU soils are unhealthy due to reduced soil biodiversity, pollution, loss of organic matter, compaction, salinization and soil sealing (Veerman et al. 2020).

Thus, while farmer concerns about local yield reductions are legitimate, they are not insurmountable. The NRL and SUR should therefore be considered as investments into the protection of farmlands, food security. Agroecological and regenerative agriculture practices such as improvement in soil fertility and carbon storage, diversification of crops, and agroforestry are necessary to reach sustainable productivity and hence food security under global warming, while protecting water resources, health of agricultural workers and profitability of farming (Reganold & Wachter 2016).
Concerns about local and temporary declines of harvested fish volumes are legitimate but vastly exaggerated. Restrictions may indeed cause a “displacement effect” on fishing, especially during transition periods (Suuronen et al., 2010; Vaughan, 2017). However, no-take zones (the strictest protection level) cover merely 1% of the area of European Marine Protected Areas (MPAs). Putting this into perspective, the proportion of marine areas affected by conservation efforts and hence the number of affected fishers is small. Furthermore, appropriate measures and incentives exist to support affected fishers (Greenstreet et al., 2009; Suuronen et al., 2010), and can be adopted and further developed as part of the NRL. More importantly, however, focusing on local losses ignores the main risks to fisheries, as well as the many benefits that can be achieved by protection measures.

The main risks to fisheries do not stem from setting up Marine Protected Areas (MPAs), but rather originate from the combination of unsustainable fisheries and climate change. The fraction of marine fish stocks harvested at an unsustainable level globally has increased from 10% in the 1970s to almost 35% in 2017 (Stankus, 2021). Estimates suggest that in Europe up to 70% of all fish stocks are harvested unsustainably (Issifu et al., 2022). Large species, either directly targeted or caught as bycatch, are under exceptionally high risk of extinction (Fernandes et al., 2017). The main risks to fisheries do not stem from setting Marine Protected Areas (MPAs) but rather, originate from the combination of unsustainable fisheries and climate change. The fraction of marine fish stocks harvested at an unsustainable level globally has increased from 10% in the 1970s to almost 35% in 2017 (Stankus, 2021). Estimates suggest that in Europe up to 70% of all fish stock are harvested unsustainably (Issifu et al., 2022). Large species, either directly targeted or caught as bycatch, are under exceptionally high risk of extinction (Fernandes et al., 2017).

Establishing MPAs, especially large and fully protected ones, has been shown to be the most cost-effective means to preserve and even enhance fisheries yields (Di Lorenzo et al., 2020; Frid et al., 2023; Pendleton et al., 2018; Sala & Giakoumi, 2018). MPAs lead to an increase in species biomass and diversity, and promote the dispersal of larvae and adults of various taxa (Pendleton et al., 2018 and references therein). For example, a recent meta-analysis has shown that the biomass of whole fish assemblages in fully protected marine reserves is, on average, 570% greater than in adjacent unprotected areas, and 243% greater than in partially-protected MPAs (Sala & Giakoumi, 2018).

Scientific evidence shows that well managed and highly protected MPAs positively affect adjacent fisheries due to spill over effects from MPAs into nearby, less protected or unprotected areas (Di Lorenzo et al., 2020; Edgar et al., 2014; Grorud-Colvert et al., 2021), e.g. > 30% higher abundance and > 50% higher biomass along the MPA borders compared to more distant regions (Di Lorenzo et al., 2020). The positive effects of MPAs are likely to persist also under climate change (Frid et al., 2023), which is one of the biggest challenges for commercial fisheries (Pendleton et al., 2018).

However, MPAs in European waters are currently neither well-managed nor highly protected (Dureuil et al., 2018; Perry et al., 2022). In over 80% of the total area of MPAs in Europe and the UK, “high-risk” fishing practices take place (Perry et al., 2022). For example, bottom trawling, considered as especially destructive for marine flora and fauna (Steadman, 2021) and contributing disproportionately to climate change and CO₂-emissions compared to other types of fishing (Cavraro et al., 2023), has been documented in almost 60% of Atlantic and Baltic Sea MPAs (Dureuil et al., 2018). There is therefore an urgent need to improve management in MPAs.
The NRL goes beyond the mere protection of certain marine areas and includes also the active restoration of key nursery or essential fish habitats. These measures can further help the recovery of fish and shellfish stocks over time and thereby enhance food security.

**Claim 3 by opponents of the SUR and NRL: The new regulations will take away jobs.**

*Scientific evidence: SUR and NRL can create a range of employment opportunities and stimulate innovation.*

Any new policy or regulation may affect some beneficiaries of the current business model, especially during the transition period. However, the claim diverts attention from the key factors affecting jobs in agriculture and fisheries, and ignores the potential of new jobs being generated, as explained below.

Employment in agriculture is indeed continuously declining: In 2020, there were 9.1 million farms in the EU, i.e. 5.3 million fewer than in 2005 (a decline of about 37%; Eurostat, n.d.). This decline is driven by two key factors: structural changes (i.e. increasing centralization) and technical progress resulting in the replacement of labour by agricultural technologies (Westhoek et al., 2014).

Current policies disadvantage small-scale farmers and lack sufficient instruments and budgets to avert the ongoing rural exodus. The result is a rapid loss of jobs in the agricultural (Scown et al., 2020) and fisheries sector (Gascuel et al., 2011), alongside an ageing farm population and increasing rates of suicide among farmers (Bossard et al., 2016). Given the inequitable distribution of CAP’s Direct Payments, small-scale farmers receive only a small proportion of funding (Scown et al., 2020). Still in the recent period, only ca. 10% of the CAP-funding 2023-2027 in the EU is provided as ‘redistributive payments’ addressing competitive disadvantages of small farms (Becker et al., 2022). The effects of climate change and land degradation further make farming a less attractive livelihood. Thus, concerns about employment in the agricultural and fisheries’ sector should focus primarily on promoting sustainable production, improving the resilience of small- and family-businesses, improving the distribution of existing subsidies, and generating greater benefits by shortening value chains (e.g., through direct marketing).

Restoration of ecosystems and their multiple uses have a potential to create new employment, through new models of production (e.g. paludiculture) (Temmink et al., 2023). Business models focusing on extensification that tend to be more labour intensive can preserve or generate employment opportunities, as well (Vandeplas et al., 2022; Vona, 2019). Most importantly, by complementing the Nature Directives, the NRL and SUR will be essential in preventing the climate-change-induced collapse of local and regional production systems, and with them the subsequent collapse of jobs in the coming decades.

Restoration of ecosystems and their multiple uses have a potential to create new employment, through new models of production (e.g. paludiculture) (Temmink et al., 2023). Business models focusing on extensification that tend to be more labour intensive can preserve or generate
employment opportunities as well (Vandeplas et al., 2022; Vona, 2019). Most importantly, by complementing the Nature Directives, the NRL and SUR will be essential in preventing the climate-change-induced collapse of local and regional production systems, and with them the subsequent collapse of jobs in the coming decades.

We note that some publications on the potential impacts of the Farm to Fork strategy do forecast losses of incomes and jobs (e.g. Barreiro et al., 2021; Beckman, 2020; Henning et al., 2021). However, these assessments suffer from conceptual and practical limitations, for instance by ignoring the socio-economic and technological adaptation capacities of farms, ignoring the interactions between complementary policy instruments, and not considering the entire value chain (Candel, 2022). Because biodiversity, social stability, and the quality of rural livelihoods are tightly linked (Ghermandi et al., 2013), a broader scope is needed that looks at the overall performance of agriculture and fisheries as part of a global socio-ecological system. NRL and SUR, as part of Green Deal package, need to be accompanied with policies that create appropriate conditions, including employment opportunities for smallholders and small-scale fisheries (Björkvik et al., 2020), support for transitions to more sustainable production, capacity building for grassroot initiatives (e.g. farmer-led ones; Bohan et al., 2022)), and investments into social innovation and novel technologies for sustainable production (Leopoldina 2020). These are requirements for the job security of farmers and fishers in the long term.

Claim 4 by opponents of the SUR and NRL: The new regulations will place a burden on society.

**Scientific evidence:** A transition to sustainable land- and marine-use production is an investment with a high rate of return and multiple beneficiaries across society, with the number of beneficiaries being far larger than that of losers.

At the local scale and in the short-term trade-offs between production and nature-protection measures do exist. However, on the larger scale and in the longer term the benefits of nature restoration are estimated to surpass the costs. This is especially true in intensively managed landscapes where the risks for food production losses under current production systems are the highest (IPBES, 2018b).

Like every other policy instrument, the NRL and SUR will generate costs in implementation, incentives, compensations etc. However, considering the range of public benefits, the expenses can be considered an investment rather than a burden. The restoration of carbon-rich ecosystems provides significant economic benefits through, among others, mitigation of climate change damages (Hepburn et al., 2020). For example, the monetary value of the carbon stock of the seagrass meadows of the Baltic Sea alone was determined to be 231.9 million euros (Röhr et al., 2016) and the value of the carbon stock of European forests has been estimated at €1,493/ha (€783-3,468/ha) (Raihan et al., 2021).

Across most of the North-West EU countries, the restoration will affect areas currently under agricultural production. It has been demonstrated that the current model of agricultural production in the EU generates a considerable burden on society: taxpayers in the EU pay once through the subsidies under CAP (55 bn. EUR p.a. in 2022), and a second time by paying the externalised environmental costs (e.g. 100 bn. p.a. in Germany alone (Kurth et al., 2019)). Some examples of the costs are:

1) **Climate Change:** During the drought of 2018, yield losses in many arable systems in Germany ranged between 15 and 25% (D’Agostino, 2018) with estimated values for these losses about 7-8 bn. EUR (Trenczec et al., 2022). Costs to compensate farmers were estimated at 572 Mio. EUR in Germany, Sweden and Poland alone (Bastos et al., 2020). Similarly, economic losses of up to several hundred billion Euros have been predicted for European forestry until the end of the century (Hanewinkel et al., 2013).

2) **Biodiversity decline:** Wild mammal biomass declined by 82%, and 66% of marine areas were heavily degraded as of 2014 (IPBES, 2019). These losses threaten well over 4 billion people
who rely on wild species for their livelihood, such as fisheries, crop production, natural medicines or wood-based fuel (IPBES, 2019). The loss of pollinators affects 75% of global food crop types and 33-35% of all agricultural land (IPBES 2016). An estimated average economic value of crop pollination by insects in the EU, estimated by production data from 1991 to 2018 (FAOSTAT 2020), ranged between 7 and 18 billion USD/year, equivalent to 8.1–9.9% of the total value of plant production.

3) Pesticides overuse: 385 million people suffer from pesticide poisoning annually (Tostado & Bollmohr, 2022). European consumers also suffer from growing exposure to pesticides, with a positive and consistent upward trend of Candidates for Substitution residues in fruits and vegetables (Pesticide Action Network Europe, 2022). A pan-European study in five countries showed that in 84% of urine samples from adults and children, at least two different pesticides were detected, with children being particularly highly affected (Ottenbros et al., 2023). In several EU countries, most water sources are in very poor status (Kristensen et al. 2018). Long-term exposure to synthetic pesticides, in particular some insecticides, is linked to the increased incidence of Parkinson’s disease (Paul et al., 2023).

4) Nitrate leaching: In 2008, the external costs due to Nitrogen exposure in Europe were estimated to be between 75 and 485 billion € / year. The net benefit of its usage (20-80 billion €) was smaller than the external costs (Van Grinsven et al., 2013).

The SUR and NRL may help to economically stabilise or restore the number of small farms and farm resilience. This is because the shift to an extensive farming approach can be done in a way that generates benefits to small- and family-farms. Thus, even within the farming sector, there are more potential winners than losers.

Overall, estimations show that restoring areas protected under the Habitats Directive to a good condition over 10% of the EU territory would cost in total circa €154 billion. The projected benefits of restoring the EU’s biodiversity-rich habitats are expected to reach €1,860 billion. This is a cost benefit ratio of 1:12 in favour of benefits (European Union, 2022).

Beyond monetary value, biodiversity and associated ecosystem services are central for physical and mental wellbeing across a range of environments, including urban spaces (Marseille et al. 2021; Methorst et al. 2021a,b), intrinsic and relational values (IPBES, 2022; Pascual et al., 2017) and other dimensions of wellbeing (Dasgupta 2021). Considering that the benefits to society exceed the costs by at least an order of magnitude in economic terms, and far more in non-monetary values, the SUR and NRL should be considered as a cost-efficient investment and an insurance-investment into health, wellbeing, and a viable environment for stable production.

**Claim 5 by opponents of the SUR and NRL: The new regulations will prevent Europe from feeding the world.**

*Scientific evidence: Europe can contribute to feeding the world not by producing more but rather by reducing its resource-consumption, especially as a key producer and consumer of animal-based food and 1st-generation biofuels*

Food security is clearly an issue, but its causes are complex and go far beyond the volumes of primary production. Global hunger is not the result of insufficient global food production but rather determined by many other factors such as poverty (Holt-Giménez et al., 2012) or accessibility to food (Tschamntke et al., 2012). Other drivers of food security are unhealthy diets, characterised by disproportional consumption of animal derived food products (Costa et al., 2022) and low-quality food that is rich in fat and sugar. Currently, there are more people suffering from obesity than those suffering...
hunger (Benton & Bailey 2019); while food waste is a major issue in the EU and other industrial countries (Tscharntke et al., 2012).

Overall, the trading balance is highly unequal among food and agricultural products: Between 2010-20, the EU had a degree of self-sufficiency above 100% for productions such as pork (117%), beef and veal (106%), poultry (111%) or milk (110%), and ca. 108% for grain (EU Commission, 2023). However, the EU heavily depends on imports for other commodities, such as soy (14%), palm oil (0%), oil seeds (63%) and maize (89%) used mostly as feed, leading to substantial use of land and resources in the global south. More generally, due to its high consumption of resources (including many non-essential but land-consuming products such as cacao and coffee), the EU’s land footprint equals twice the area of its territory (Kastner et al., 2021). This includes imported deforestation (especially for soy and palm oil), further driving climate change and landscape degradation, and risking human populations elsewhere. Finally, the subsidised consumption of land for biofuels is resulting in increasing food prices and a subsequent decrease in accessibility to food products for the poorest (Lakner, 2023). Thus, maintaining current production and consumption patterns, or increasing food production in the EU, is by no means a guarantee to improve global food security.

Another key issue is overproduction and waste: Food waste in Germany alone amounts to ca. 12 mio. tons of food per year, of which 7–7.6 Mio. tons could potentially be avoided, mostly from private households (Schmidt et al., 2019). Key barriers to resolve can be the role of retailers, and economic incentives operating against zero food waste (Koester, 2014).

The EU can therefore contribute to global food security by altering its own patterns of consumption, production, and land-use. A large proportion of grain in the EU is dedicated to non-food purposes: In 2020/21, 4.2% of the grain has been used to produce biofuels, another 62.4% is used to produce animal feed-stuff (European Commission. Directorate General for Agriculture and Rural Development. et al., 2020; Lakner, 2023). Reducing its own production and consumption of animal products, as well as 1st generation biofuel, can free land to both produce less resource-demanding crops and at the same time provide space to restore nature. Thereby, the NRL can be successfully implemented without jeopardising food production, let alone food security. By reducing its import of feed the EU would further reduce pressure on agricultural land elsewhere. In sum, by addressing production and consumption, especially of animal derived food products (Costa et al., 2022), milk products and biofuels (Iacobuță et al., 2022; Lakner, 2023, ETTG 2022), and by reducing food waste (Partiff et al. 2010, Shepon et al., 2018), the EU can support food system sustainability.

At the larger scale, mitigation of potential yield losses should include measures to cap the production of feed and fuel, by supporting a shift to plant-based diets (Ritchie et al., 2018; Röös et al., 2017) and by phasing out the support for first generation biofuels (EEAC Network, 2022).

**Claim 6 by opponents of the SUR and NRL: These new regulations will be too risky in times of a war.**

**Evidence: Short-term disruptions to supply-chains and prices do not indicate any risk to food sovereignty or a need to enhance production**

Indeed, the Russian war on Ukraine generated a shock to food and energy prices and short-term food shortages especially outside the EU. The price for wheat increased from 275 EUR/t to ca. 400 EUR/t in June 2022, but then decreased to around 300 EUR/t by January 2023. Based on increased exports by Russia and maintained deliveries by Ukraine, supply levels stabilised in the second half of 2023. Based on the grain-deal between Russia, Ukraine and Turkey, the exports by Ukraine, and thereby the global grain supplies were stabilised (Götz & Svanidze, 2023). In the medium-term, a tight supply situation for grain, maize and oil-seeds might remain a challenge, but it is largely independent from biodiversity policies in the EU (Lakner, 2023).
On the other hand, too low prices in the Eastern EU and a claimed regional oversupply of Ukrainian grain led the EU Commission to restrict deliveries of Ukrainian agricultural commodities from March 2023 onwards. This situation and the decision of the EU Commission therefore contradicts the claim that Europe is facing a sharp scarcity of commodities due to the war. Thus, the war in Ukraine offers no argument to delay sustainability transition, including nature restoration, certainly not on the grounds of grain scarcities.

While opponents of the SUR and NRL are further using the war in Ukraine as an argument against new regulations, we note with concern that the war has already been used to promote a derogation of Ecological Focus Areas in 2022, on GAECs 7 and 8 in 2023, and to shift budgets away from Pillar 2 (i.e. away from rural development and farmers therein) to rather support fertilisers. Proposals have already been made to prolong the derogation to 2024. However, data has already shown that this derogation had a negligible impact on food production, and rather freed land for feed. In 2017 EU-wide, 1,838,618 ha were registered as fallow land, of which circa 50% are in semi-arid areas of Spain (Alliance Environment, 2020). In most EU countries, fallow land is on the least-productive locations providing little potential to contribute to food production. Calculations suggest that the expected yield is between 3.6 and 5.3 Mio. tons of grain, probably with low baking quality (for details see Lakner et al., 2022). Given the traded quantities on the world market, the potential will not have a significant impact.

Finally, there are other measures that are shown to be more affective to improve food resilience, specifically in times of the ongoing war in Ukraine, such as reducing energy demand in transport, buildings and food production (Creutzig, 2022; Sun et al., 2022).

The Green Deal, and the SUR and NRL therein, should be promoted rather than halted in times of war as means to foster a faster transition to sustainable models of production and consumption, to reduce dependence on imported energy and agrochemicals, and to ensure that agri-food systems are healthy, fair, self-sufficient and resilient (Iacobuță et al., 2022).

**Claim 7: NRL will force farmers to abandon 10% of their agricultural land**

*Evidence: Restoring landscape features and setting aside some field area is not abandoning land but rather restoring functional production landscapes that can help halt land abandonment*

Land abandonment mostly happens in marginal areas where farmers cannot sustain themselves, such as in remote mountain areas, or marginalised rural regions within many Member States. It is particularly High Nature Value farmlands in Europe that experience this phenomenon - and this is partly due to insufficient support by the Common Agricultural Policy (Pe’er et al., 2021; Scown et al., 2020).

The use of the term “abandonment” is therefore both incorrect and misleading: abandonment happens at farm level while NRL provides incentives to diversify the agricultural landscapes by ensuring that every farm has some area under natural and semi-natural elements, or environmental fallow. That such diversification delivers multiple benefits has been extensively studied across the EU, and is by now well understood and documented (e.g., Petit & Landis, 2023; Pywell et al., 2015; Tscharntke et al., 2012). Examples of benefits include private benefits to production through improved pollination and biological control of pests on crops, and enhanced soil functioning, as well as public benefits such as water purification, carbon sequestration, erosion control, and landscape amenity. They are crucial for maintaining biodiversity within agricultural environments, with benefits exceeding and complementing those from organic management of crops (e.g., Schneider et al., 2014).

As illustrated in Claim 6 with Ecological Focus Areas and GAEC 8, agricultural land under such diversification measures has minor direct production potential. An EU-scale modelling demonstrated that, if taken into production, such least productive areas would provide a relatively low production of gain compared to the subsequent losses in biodiversity (Jeanneret et al., 2021).
Moreover, existing nature protection already take a large proportion of farmland areas in most EU countries, but many of these areas are in poor condition. It includes semi-natural areas and landscape elements, or set aside as fallow land to allow the recovery of soil and biodiversity, as a target under the Habitat Directives and the CAP. In the EU-27, 14.2% of land surface is taken by the habitat directive, yet 81% of that is in poor condition (European Environment Agency, 2019, 2020). In the last CAP-reform 2021, around 4% of arable land was foreseen for non-productive purposes to support biodiversity - albeit, much of these areas was suspended in 2022 in response to the war in Ukraine. Agri-environment-climate Measures and Eco-schemes were further installed to compensate or support farmers in delivering nature-protection measures on larger area, with the specific target of supporting the expansion of the area to reach the 10% target of the Biodiversity Strategy. Thus, the claim that 10% land would be abandoned due to the NRL lacks a factual basis. Notably, the measures implemented so far have not been able to reverse farmland biodiversity losses (e.g., Rigal et al., 2023); and the derogations on Ecological Focus Areas (in the year 2022) and GAECs 7 and 8 (in 2023) may worsen the conditions further.

The NRL rather complements the CAP by introducing new compensatory measures and other tools to support landowners. Moreover, the NRL addresses long-standing requests to deal with situations where agricultural land is taken out of production permanently - for restoration, rewetting, rewilding etc. – and thus loses the status of agricultural land and direct support under the CAP. Farmers and other producers need support to generate other forms of benefits from such land, and to shift to new business models.

**Claim 8 by opponents of the SUR and NRL: The NRL comes in conflict with renewable energy targets.**

*Evidence: Restoration of carbon-rich forests is a cost-efficient way of mitigating climate change and restoring biodiversity, while burning forest biomass has a highly contested role in the portfolio of renewable energy sources.*

There is an evident trade-off in using land for competing purposes, in this case maximising the harvest of wood biomass for bioenergy versus restoring and maintaining forests in their natural state for biodiversity and carbon storage. This is well illustrated by the case in Finland, where chemical, forest and energy sectors outlined targets for intensified forest biomass use, well in excess of the attainable yield from Finnish forests, and over double that of the already high logging level of 2019 (Majava et al., 2022). The increased logging is projected to decrease the carbon sink jeopardising the 2035 climate neutrality goal and posing further risks to already highly endangered biodiversity.

Both targets on the restoration of carbon-rich ecosystems, and on renewable energy address primarily the mitigation of climate change. Burning forest biomass has a considerable range of efficiency (Cowie et al., 2021) and may even emit more CO₂ per unit of energy than burning fossil fuels (Schlesinger, 2018). The latest independent assessment demonstrated that bioenergy may play a much smaller role in climate change mitigation than suggested by most earlier scenarios (Merfort et al., 2023).

Burning wood provides about 40% of the EU’s renewable energy with half of it being “primary woody biomass” rather than residues and post-consumer wood (Camia et al., 2021). The practice is currently only economically viable due to considerable public subsidies. It is therefore a highly contested tool for climate mitigation, a social burden and endangers biodiversity. Even if the restoration targets are fully achieved under NRL, they do not preclude use of the restored and remaining forestland (which is 90% excluding strictly protected forests) for multiple products, including bioenergy from the residues and side-streams. It is critically important that the EU restricts burning of primary forest biomass from its renewable energy targets and diverts subsidies into zero-emissions renewable energy and energy efficiency measures.
Research evidence highlights that the most important climate change mitigation measures are i) protecting and enhancing natural climate sinks (DeCicco & Schlesinger, 2018), and ii) reducing energy demand, especially in transport, buildings and food production (Creutzig, 2022). The latter alone is likely to be sufficient to cut the EU dependency on imported gas and oil (ibid).

**Discussion**

Societal and political debate is essential in democratic societies and is particularly valuable in promoting well-informed societal transitions. For them to be productive and benefit society, such debates should make use of the best empirical evidence available rather than swiping unsupported claims. In this paper, we undertook to address several of the numerous claims proposed by the political opponents of two legislative pieces, namely the Nature Restoration Law (NRL) and the Sustainable Use Regulation (SUR).

In a time of multiple crises, the European Green Deal offers a comprehensive and ambitious framework to simultaneously address multiple challenges facing the European Union and beyond. Nature is key to addressing these challenges. The NRL and SUR therefore represent a unique opportunity and an essential step to mitigate climate change, halt biodiversity loss, ensure long-term food security and strengthen the resilience of the farming, forestry and fishery.

Some of the claims against the NRL and SUR are based on short-term socio-economic events such as pandemics, military conflicts, financial crises. However, none of these short-term events justify delaying actions addressing the global long-term degradation of the planetary life-support systems. Indeed, as numerous reports demonstrate, delays are likely to lead to ever increasing costs of action (Ackerman & Stanton, 2008; Ahmed et al., 2022; OECD, 2019; Sanderson & O’Neill, 2020; Sumaila & Cheung, n.d.). To tackle the challenges ahead of us, effective nature restoration, shifting towards sustainable use of resources and limiting risks from agrochemicals are essential to address the needs of citizens within and beyond the EU. The proposed legislative packages on NRL and SUR are therefore timely, and their adoption should not be delayed.

Where concerns are raised with respect to the farming sector and rural areas, solutions should be sought in the Common Agricultural Policy (CAP), which comes at an outstanding cost to European taxpayers. It is complex and cumbersome, imposes burdens on farmers and administration, while at the same time it misses most of its own key targets, including the protection of rural livelihoods for large groups of farmers (Pe’er et al., 2019, 2020; Scown et al., 2020, European Court of Auditors, 2021); and it is criticized even by some of its beneficiaries (Bethge & Lakner, 2023). A constructive reform of the CAP post-2027 may therefore be an effective way to both improve its performance and generate coherence with the Green Deal.

Beyond complementing the CAP, new policies are needed because policy gaps are clearly prevailing concerning urban areas, marine and freshwater environments, peatlands, and forests (especially under current pressures to expand plantations), as well as the lack of legal and financial instruments to restore nature and ecosystem functions. The NRL and SUR provide a legally binding mechanism to support policy objectives already adopted or proposed for adoption (outlined in the Biodiversity Strategy, the EU Forest Strategy for 2030, the Soil Monitoring and Resilience Directive and others). They can contribute to a more coherent set of policy instruments, while providing implementation options that will allow Member States to adapt these instruments to regional contexts. Their implementation can build on the experiences with previous EU-wide nature legislation, such as the Habitats and Birds Directives. These were also unprecedented at the time and met widespread criticism and resistance from landowners. However, their success in achieving some of their key biodiversity objectives is well documented (Barnes et al., 2023; Princé et al., 2021; Sotirov, 2017). Co-
benefits also include improvements in water quality (Lehtoranta & Louhi, 2021) and protection of cultural heritage (European Commission, 2018).

Installing and implementing the NRL and SUR can provide wide-ranging and long-term benefits to many stakeholders and society. The broad support that these proposals received from many businesses confirm their potential value to provide economic and employment opportunities. Like other policies, the NRL and SUR will naturally favour some stakeholders over others: some will take full advantage of these regulations, while others may need support in adapting to them. Disparities in the consequences of these new regulations on stakeholders may trigger some conflicts. Conflicts between nature conservation and economic activities are, however, not new. Implementing the new laws can benefit from a huge body of literature studying conflicts, as well as avenues to resolve them (e.g., Lécuyer et al., 2021; Oppla, 2023). The NRL and SUR can be seen as a solution to address some of the existing conflicts within the CAP and other policies, compensate farmers and landowners for land use conversion, potential associated losses and investment in new business models.

While Member States need to have sufficient flexibility to ensure that implementation is suitable to their specific bioclimatic, socio-economic, and political contexts, the NRL and SUR are important mechanisms to address transboundary challenges: biodiversity, climate stability, fish stocks, water and soil health, are commons that see no borders. They belong to all citizens and affect our economy, livelihoods, and culture, be it in Europe or globally (Dasgupta, 2021). Germany cannot mitigate climate change within its national borders any better than Finland can protect its birds migrating to and through Italy. The EU has little leverage to prevent deforestation and agricultural expansion outside its borders (European Union, 2023) unless it is prepared to restore some of its own deforested regions and drained peatlands. Responding to the crises of biodiversity loss and climate change requires a common natural capital policy with shared responsibilities and mechanisms to support a just transition. The proposed legislation, which would cover all ecosystems and the most ubiquitous pollutants across the Union, is timely and should be welcomed by all social groups. It offers a clear added value for the EU as an institution that cares for citizens beyond national borders.

Both proposals are also essential for the EU to meet its commitments under the Paris Agreement of the UN Framework Convention on Climate Change (UN, 2015) and the UN Convention on Biological Diversity (CBD, 2022), in particular Target 2 of the recently adopted Kunming-Montreal Global Biodiversity Framework. The adoption and implementation of the SUR would enable the EU to meet its commitments under Target 7 of the Kunming-Montreal Global Biodiversity Framework, which calls for reducing the risk from pesticides and highly hazardous chemicals by at least half by 2030. Europe has a historic responsibility for its impact, both within its own borders and globally. The EU can choose to be a leader in environmental protection and a just and sustainable transition, or it can fail to act because of internal political disagreements and hold back global progress.

Some of the justified claims that extensification of land-use may generate “leakage effects” on other parts of the world, should optimally be addressed by seeing the NRL and SUR as part of a broader set of policies, as envisaged by the Green Deal as a whole. Particularly, focus must be placed on the entire value chain, addressing challenges with retailing, business and consumption behaviour. Along this line, it is envisaged that the Commission will soon release a Sustainable Food System Framework, *inter alia* to provide equitable access to healthy food by, among other measures' promoting circular business models, shortening supply chains, and revising rules to take account of consumer research (European Union, 2020). These initiatives would complement existing policies and address policy gaps along the value chain, from farm to fork.
To conclude:
Nature conservation is one of the few issues where public opinion is almost unanimous. In a Eurobarometer survey among over 27,000 citizens (Kantar, 2020), 94% of citizens expressed that protecting the environment is important for them. The EU consultation on “modernising and simplifying the CAP” confirmed that most farmers also share this concern, with a majority of farmers calling for an improvement in the environmental performance of the CAP (ECORYS, 2017). The science reviewed here supports the concerns of citizens, including farmers, and justifies immediate action. Scientists across all relevant disciplines can provide the much-needed evidence, and are keen to support where possible. Yet it is the job of decision-makers to take responsible decisions, to secure optimal policy design, and to make implementation feasible.

Acknowledgements

This position paper has benefitted from the iCAP-BES project awarded to G.P. and A.B. by the German Centre for Integrative Biodiversity Research (iDiv) Halle-Jena-Leipzig (DFG FZT 118), funding from the Research Council of Finland (decision 350649) awarded to I.H. The work of MFM was supported by the German Research Foundation DFG under the grant agreement number 442032008 (NFDI4Biodiversity). The project is part of NFDI, the National Research Data Infrastructure Programme in Germany.

1418. Dr. Lukas Eigentler, University of Bielefeld, Germany
1419. PhD Paul Einhäupl, RIFS - Helmholtz Centre Potsdam, Germany
1420. Prof. Dr. Ulrich Eisler, University of Groningen, Netherlands
1421. Prof. Dr. Olaf Eisen, Alfred Wegener Institute, Helmholtz Centre for Polar and Marine Research, Germany
1422. Prof. Dr. Nico Eisenhauer, Leipzig University, Germany
1423. Prof. Dr. Nina Eisenmenger, University of Natural Resources and Life Sciences, BOKU Vienna, Institute of Social Ecology, Austria
1424. Dr. Corine Eisig, GELIFES, University of Groningen, Netherlands
1425. Prof. Dr. Sebastian Eiter, NIBIO - Norwegian Institute of Bioeconomy Research, Norway
1426. Dr. Mads Ejbye, University of Copenhagen, Denmark
1427. Dr. Bikem Ekberzade, İstanbul Technical University, Turkey
1428. Dr. Camilla Ekblad, University of Turku, Finland
1429. Dr. Elisabeth Ekner, KTH Royal Institute of Technology, Sweden
1430. Prof. Dr. Oguzhan Ekizoglu, Tepecik Training and Research Hospital, Izmir, Turkey
1431. Prof. Torbjørn Ekrem, Norwegian University of Science and Technology (NTNU), Norway
1432. Sami El Geneidy, University of Jyväskylä, Finland
1433. Dr. Walid El Houri, Forum Transregional Studien, Germany
1434. M.Sc. Léonard El-Hokayem, Martin Luther University Halle-Wittenberg, Germany
1435. Prof. Marek Eliáš, University of Ostrava, Czech Republic
M.Sc. Jelger Elings, Ghent University, Belgium
M.Sc. Julia Ellerbrok, University of Marburg, Germany
Dr. Sam Ellis, Butterfly Conservation Europe, United Kingdom
M.Sc. Pierre Ellssel, University of Natural Resources and Life Sciences, Vienna, Austria
M.Sc. Julia Ellerbrok, University of Marburg, Germany
Dr. Sam Ellis, Butterfly Conservation Europe, United Kingdom
Dr. Abdelbassir Elsayed, University of Lodz, Poland
M.Sc. Friederike Elsner, FH Münster, University of Gießen, Germany
Dr. Ludger Eltrop, IER University of Stuttgart, Germany
Dr. Thomas Eltz, Ruhr-Universität Bochum, Germany
PhD Tiina Elvisto, Tallinn University, Estonia
Dr. David Eme, INRAE, Riverly, France
Dr. Katie Emelianova, University of Vienna, Austria
M.Sc. Simon Emken, University of Hildesheim, Germany
Laure Emperaire, IRD, France
Dr. Dag Encke, Nuremberg Zoo / Tiergarten Nürnberg, Germany
Vincent Enders, Institut für Umweltphysik, Universität Heidelberg, Germany
Dr. Magnus Engardt, Stockholm University, Sweden
Dr. Felicitas Engel, Heidelberg University, Germany
Prof. Dr. Stefanie Engel, Osnabruack University, Germany
M.Sc. Thore Engel, Friedrich-Schiller-Universität Jena, Germany
Claudia Engelhardt, TU Dresden, Germany
M.Sc. Eva Katharina Engelhardt, Biochange Lab, Terrestrial Ecology Research Group, Technical University of Munich, Germany
Dr. Yuri Engelhardt, University of Twente, Netherlands
Prof. Dr. Jan Engler, Landscape Research, Geography Department, Ghent University, Belgium
Prof. Göran Englund, Umeå University, Sweden
Prof. Jorma Enkenberg, UEF, Finland
M.Sc. Tuguldur Enkhbaatar, Institute of Biochemistry and Biophysics, Polish Academy of Sciences, Poland
Dr. Bruno Ens, Stichting Onderzoek Scholekster, Netherlands
M.Sc. Julian Enß, Aquatic Ecology, University Duisburg-Essen, Germany
Dr. Andreas Ensslin, Conservatory and Botanic Garden of the City of Geneva, Switzerland, Switzerland
Dr. Manfred Enstipp, IPHC-DEPE/CNRS Strasbourg, France
Prof. Dr. Martin Entling, RPTU University of Kaiserslautern-Landau, Germany
Dr. Lur Epelde, NEIKER, Spain
Dr. Yaffa Epstein, Uppsala University, Sweden
Karlheinz Erb, Institute of Social Ecology, University of Natural Resources and Life Sciences, Vienna, Austria
Dr. Stella Erdmann, Institute of Medical Biometry, Germany
Dr. Laszlo Erdos, Centre for Ecological Research, Hungary
M.Sc. Jesse Erens, Wildlife Health Ghent - Ghent University, Belgium
Prof. Dr. Alexandra Ernfee, Kiel University, Germany
PhD Niclas Ericsson, Swedish University of Agricultural Sciences, Sweden
Prof. klemens eriksson, University of Groningen, Netherlands
Dr. Lisa Ernoul, Tour du Valat, France
Dr. Raffael Ernst, Senckenberg Gesellschaft für Naturforschung, Germany
Prof. Dr. Tibor Erős, director of Balaton Limnological Research Institute, Hungary
Prof. Dr. Thomas Ertl, University of Natural Resources and Life Sciences Vienna, Austria
1483. PhD Gema Escribano-Avila, Biodiversity and Evolutionary Biology Department, Complutense University, Madrid, Spain.
1484. Prof. Dr. Adrián Escudero, Universidad Rey Juan Carlos, Spain.
1485. Dr. Marcial Escudero, University of Seville, Spain.
1486. Dr. Mariam Esmaeeli Moghaddam, Institute of Biochemistry and Biophysics, Poland.
1487. Dr. Danial Esmaeili, Helmholtz Centre for Environmental Research – UFZ, Germany.
1488. Dr. Marianne Espeland, Leibniz Institute for the Analysis of Biodiversity Change – Museum Koenig, Germany.
1489. Mathilde Esselin, University of Montpellier, Biology and Ecology Departement, France.
1490. Dr. Hans-Joachim Esser, Botanische Staatssammlung Muenchen. Staatliche Naturwissenschaftliche Sammlungen Bayerns, Germany.
1491. Dr. Helen Esser, Wageningen University & Research, Netherlands.
1492. Prof. Dr. Sara Essert, Faculty of Science, University of Zagreb, Croatia.
1493. Prof. Dr. Franz Essl, University Vienna, Austria.
1494. Prof. Miguel Angel Esteve-Selma, Department of Ecology and Hydrology, University of Murcia, Spain.
1495. Rampal Etienne, University of Groningen, Netherlands.
1498. Dr. Stephanie Evers, Liverpool John Moores University, United Kingdom.
1499. Dr. JAMES WILLIAM EVERTS, UNIVERSITY OF CAPE TOWN, Netherlands.
1500. Dr. Michael Ewald, Karlsruhe Institute of Technology (KIT), Germany.
1501. Dr. Stefan Ewert, University of Greifwald, Germany.
1502. Dr. Jack Faber, Wageningen Research, Netherlands.
1503. Dr. Yvonne Fabian, Agroscope Reckenholz Zürich Affoltern, Switzerland.
1504. Prof. Marie Fablet, University Lyon1, France.
1505. PhD Pierre-Henri Fabre, Montpellier University, France.
1506. Dr. Pernet Fabrice, Ifremer, France.
1507. Prof. Massimo Faccoli, University of Padua, Italy.
1508. Dr. Bruno Fady, INRAE, France.
1509. PhD Marco Faggian, EDB, CNRS Toulouse, France.
1510. Prof. Massimo Fagnano, Università degli studi di Napoli Federico II, Italy.
1511. Prof. Jaime Fagúndez, Universidade da Coruña, Spain.
1512. Dr. Jakob Fahr, Niedersächsischer Landesbetrieb für Wasserwirtschaft, Küsten- und Naturschutz (NLWKN), Germany.
1513. M.Sc. Samantha Fahy, Dublin City University, Ireland.
1514. M.Sc. Andrew Fairbairn, Technical University of Munich, Germany.
1515. Dr. Mattia Falaschi, University of Milan, Italy.
1516. Dr. Carsten Falck, GFZ German Research Centre for Geosciences, Germany.
1517. M.Sc. Wolfgang Falk, Universität Braunschweig, Germany.
1518. M.Sc. Lisa Falkowski, Biology, Germany.
1519. M.Sc. Stefan Fallert, University of Würzburg, Germany.
1520. PhD Abigail Fallot, CIRAD, France.
1521. Dr. Matthieu Falque, INRAE, France.
1522. Dr. Julia Fält-Nardmann, University of Turku - Biodiversity, Technische Universität Dresden - Forest Zoology, Finland.
1523. M.Sc. Aurone Fanal, ULiège, Belgium.
1524. Prof. Dr. Josef Fanta, Insitute of Botany AS CZ, Czech Republic.
1525. Dr. Jose Fariñas-Franco, Atlantic Technological University, Ireland.
1526. Prof. Dr. Vinicius Farjalla, Federal University of Rio de Janeiro, Brazil.
1527. Bronislav Farkač, Charles University Environment Centre, Czech Republic.
Dr. Catherine Farrell, TCD, Ireland
Dr. Eugene Farrell, University of Galway, Ireland
Anne Farruggia, INRAE, France
Prof. Dr. Nina Farwig, University of Marburg, Germany
Prof. Lorenzo Fattorini, University of Siena (Italy), Italy
PhD Niccolò Fattorini, University of Siena, Italy
Dr. Sarah Faulwetter, University of Patras, Greece
Dr. Guy Faure, UMR Innovation, France
Dr. Charlotte FAURIE, CNRS, France
Anne Farruggia, INRAE, France
Prof. Dr. Nina Farwig, University of Marburg, Germany
Prof. Lorenzo Fattorini, University of Siena (Italy), Italy
PhD Niccolò Fattorini, University of Siena, Italy
Dr. Sarah Faulwetter, University of Patras, Greece
Dr. Guy Faure, UMR Innovation, France
Dr. Charlotte FAURIE, CNRS, France
M.Sc. Jennifer Fauster, University Assistant, Austria
Dr. Filippo Favilli, Eurac Research, Italy
Dr. Uwe Fechner, Delft University of Technology, Netherlands
PhD Jelle Feddem, Vrije Universiteit, Netherlands
Hauke Feddersen, University Hambrug, Germany
PhD Anna Fedele, Philosophisch Theologische Hochschule, Brixen, Italy, Italy
Prof. Dr. Hannes Feilhauer, Leipzig University, Germany
Prof. Dr. Peter Feindt, Humboldt-Universität zu Berlin, Germany
Dr. Virginijus Feiza, LAMMC, Lithuania
Dr. Christian Feld, University of Duisburg-Essen, Germany
Dr. Reinart Feldmann, Helmholtz Centre for Environmental Research UFZ, Germany
Dr. Maria Felipe-Lucia, Instituto Pirenaico de Ecología, Spain
M.Sc. Andreas Fellner, Paris Lodron Universität Salzburg, Austria
Dr. simon fellous, INRAE, France
PhD Annamaria Fenesi, Babeș-Bolyai University, Romania
Prof. Dr. Joachim Fensterle, Rhine-Waal-University of Applied Sciences Kleve, Germany
Dr. Tomas Fer, Dept. of Botany, Faculty of Science, Charles University, Czech Republic
Prof. Jean-Baptiste Ferdy, Université Paul Sabatier, France
Dr. Jean-Baptiste Feret, UMR TETIS, INRAE, France
Dr. Chrysanthi Fergani, Liverpool John Moore's, United Kingdom
Dr. Stefan Ferger, EuroNatur Foundation, Germany
Dr. Flavio Ferlini, Società Italiana di Scienze Naturali, Italy
Dr. Isabel Fernandes, Centre of Molecular and Environmental Biology (CBMA), University of Minho, Portugal
Dr. Lúcia Fernandes, Center for social studies, Portugal, Portugal
M.Sc. Beatriz Fernandez, University of the Basque Country, Spain
Prof. Catherine FERNANDEZ, Aix Marseille University, France
Prof. Dr. J. Angel Fernandez, University of Santiago de Compostela, Spain
M.Sc. José M. Fernández, Instituto Alavés de la Naturaleza, Spain
Dr. Marcos Fernández, CREAF, Spain
Prof. Francisca Fernandez Piñas, Universidad Autonoma de Madrid, Spain
Prof. Dr. Federico Fernández-González, University of Castilla-La Mancha, Spain
Prof. Dr. José A. Fernández-Yuste, Universidad Politécnica de Madrid, Spain
Dr. caterina ferrari, gpnp, Italy
Dr. Franck Ferraton, CNRS, France
M.Sc. Willem Ferwerda, Commonland, Netherlands
PhD Michael Fettweis, Royal Belgian Institute of Natural Sciences, Belgium
Dr. Ingo Fetzer, Stockholm Resilience Centre, Stockholm University, Sweden
Dr. Andreas Fichtner, Institute of Ecology, Leuphana University Lünenburg, Germany

Dr. Kristin Fiedler, iDiv, Germany

Dr. Sebastian Fiedler, Universität Göttingen, Germany

Dr. Alina Fiehn, Deutsches Zentrum für Luft- und Raumfahrt, Germany

Dr. Cristina Fiera, Institute of Biology Bucharest, Romania

Dr. Ludmilla Figueiredo, German Center for Integrative Biodiversity Research (iDiv) Halle-Jena-Leipzig, Germany

Dr. Thijs Fijen, Wageningen University & Research, Netherlands

M.Sc. Raquel Filgueiras, Rewilding Europe, Netherlands

Prof. Dr. Juliane Filser, University of Bremen, Germany

Dr. Elizabeth Finch, UFZ/iDiv, Germany

Prof. Dr. Maria REnate Finckh, University of Kassel, Germany

PhD Tora Finderup Nielsen, Aarhus University, Denmark

Prof. Dr. Robert Finger, ETH Zürich, Switzerland

Dr. Patrick Fink, Helmholtz Centre for Environmental Research - UFZ, Germany

Dr. John Finn, Scientist, Ireland

Marie Finocchiaro, Aix-Marseille Université, France

Prof. Francis Finucane, University of Galway, Ireland

Christina Fischer, Anhalt University of Applied Sciences, Germany

Jens Fischer, German Aerospace Center (DLR), Germany

Prof. Joern Fischer, Leuphana University Lueneburg, Germany

Prof. Dr. Leonie K Fischer, Institute for Landscape Planning and Ecology, University of Stuttgart, Germany

Prof. Marina Fischer-Kowalski, University of life Sciences and Natural Resources, Austria

Dr. Cene Fišer, University of Ljubljana, Slovenia

Dr. Živa Fišer, University of Primorska, Slovenia

Dr. Wendy Fjellstad, Norwegian Institute of Bioeconomy Research, Norway

M.Sc. franziska flachsbarth, Öko-Institut e.V., Germany

M.Sc. Jens Flade, Federal Environment Agency (Germany, UBA), Germany

Simone Flaminio, UMons, Italy

Prof. Suzette Flantua, University of Bergen, Norway

M.Sc. Daniel Flatschacher, Universität Innsbruck, Austria

Olivia Fleming, University of Edinburgh, United Kingdom

Dr. Stefan Fleck, Northwest-German Forest Research Institute, Germany

M.Sc. Maarten Flikweert, Ecologist, Netherlands

M.Sc. Lukas Flinzberger, Georg-August-University of Goettingen, Germany

PhD Gunter Flipkens, University of Antwerp, Belgium

Prof. Dr. Adam Flis, Institute of Nature Conservation, Polish Academy of Sciences, Poland

M.Sc. Hannah Flerlage, Wageningen University, Netherlands

Dr. Luuk Fleskens, Wageningen University, Netherlands

M.Sc. Maarten Flikweert, Ecologist, Netherlands

Dr. Jean-François Flot, Université libre de Bruxelles (ULB), Belgium

Dr. Kate Flood, University College Dublin, Ireland

Dr. Kate Flood, University of Edinburgh, United Kingdom

Prof. Prof. Grundler Florian, University Bonn, Germany

PhD Belén Floriano, Pablo de Olavide University, Spain

Dr. Maximo Florin, Universidad de Castilla-La Mancha, Spain

Prof. Dr. Jean-François Flot, Université libre de Bruxelles (ULB), Belgium

Dr. Timothée Flutre, INRAE, France

Dr. Andrea Focks, Osnabrück University, Germany

Prof. Dr. Ilse Foisser, University of Salzburg, Austria

Prof. Dr. Susanne Foitzik, Johannes Gutenberg Universität Mainz, Germany

M.Sc. Cecilie Foldal, University of Natural Resources and Life Science, Austria

Prof. Dr. Andreas Focks, Osnabrück University, Germany

Prof. Dr. Ilse Foisser, University of Salzburg, Austria

PhD Gabor Foldvari, Institute of Evolution, Centre for Ecological Research, Hungary
1631. PhD Vanessa Fonseca, MARE – Marine and Environmental Sciences Centre, Portugal
1632. Dr. Benoît Fontaine, MNHN, France
1633. Dr. Colin Fontaine, Cnrs, France
1634. Prof. Dr. Clement Fontan, UcLouvain, Belgium
1635. Diego Fontaneto, CNR-IRSA, Italy
1636. Dr. David Fopp, Marc Bloch Zentrum, Berlin, Germany
1637. Prof. Ruud Foppen, Radboud University Nijmegen, Netherlands
1638. Leonardo Forbicioni, World Biodiversity Association onlus, Italy
1639. Dr. Estelle FOREY, University of Rouen, France
1640. Prof. Giulio Formenti, The Rockefeller University, USA
1641. Dr. Felix Foroff, Albert-Ludwigs-University Freiburg, Germany
1642. Dr. Emma Forst, INRAE, France
1643. Hans-Jürgen Förster, Helmholtz Centre Potsdam GFZ German Research Centre for Geosciences, Germany
1644. Patrick Forstner, Med Uni Graz, Austria
1645. Dr. Nikolaus Fortelny, University of Salzburg, Austria
1646. Julie Fortin, University of Hohenheim, Germany
1647. Heike Fortmann, Northwest German Forest Research Institute, Germany
1648. M.Sc. Kiandro Fortuna, KU Leuven, Belgium
1649. Dr. julien foucaud, INRAE, France
1650. Prof. Dr. Johannes Foufopoulos, University of Michigan, Greece
1651. Dr. Eve Fouilleux, CNRS CIRAD, France
1652. Dr. Eleni Fountoulaki, HCMR, Greece
1653. Prof. Dr. Bertrand Fournier, Uni Potsdam, Germany
1654. Dr. Gerardo Fracasso, University of Sussex, United Kingdom
1655. Dr. Léa Frachon, University of Zürich, Switzerland
1656. Prof. Rui Fragoso, Universidade de Évora - Center for Advanced Studies in Management and Economics, Portugal
1657. Dr. Christelle FRAISSE, CNRS, France
1658. Dr. Sara Fraixedas, Centre for Ecological Research and Forestry Applications (CREAF), Spain
1659. Dr. Till Francke, Universität Potsdam, Germany
1660. Dr. João Franco, Polytechnic of Leiria, Portugal
1661. Adeline FRANCOIS, LESSEM (INRAE), France
1662. Dr. Clémentine Francois, University Lyon 1, France
1663. Dr. Vincent François, CNRS, France
1664. M.Sc. Claudia Frank, Dachverband Deutscher Avifaunisten e.V., Germany
1665. Dr. Erik Frank, University of Würzburg, Germany
1666. Prof. Dr. Karin Frank, Helmholtz Centre for Environmental Research - UFZ, Leipzig, Germany
1667. Dr. Sarah Frankland, The University of Melbourne, Australia
1668. Dr. Oskar Franklin, IIASA, Austria
1669. Dr. Magí Franquesa Fuentetaja, Spanish National Research Council, Spain
1670. Dr. Alain Frantz, Musée National d'Histoire Naturelle, Luxembourg
1671. PhD Kamila Franz, Comparative Research Network, Germany
1672. Dr. Mathias Franz, FU Berlin, Germany
1673. M.Sc. Tobias Franz, German Aerospace Center, Germany
1674. Henning Franzen, Humboldt-Gymnasium Berlin, 6. SPS Reinickendorf, Germany
1675. Prof. Anna Rita Frattaroli, Department of Life Hearth and Environmental Sciences - University of L'Aquila, Italy
1676. Prof. Christopher Frauenberger, University of Salzburg, Austria
1677. Prof. Dr. Fernando A. Frechoso-Escudero, Universidad de Valladolid, Spain
1678. Prof. Dr. Stefan Fredenhagen, University of Vienna, Austria
1679. PhD Vania Freitas, CIMAR, Portugal
1680. M.Sc. Anja Freiwald, Charité Berlin, Germany
1681. M.Sc. Kate Fremlin, SFU, Canada
1682. Dr. Mark Frenzel, Helmholtz Centre for Environmental Research UFZ, Germany
1683. Dr. Lena Frenzel, Technische Universität Dresden, Germany
1684. Dr. Pascal Frey, INRAE, France
1685. Dr. Jörg Freyhof, Museum für Naturkunde Berlin, Germany
1686. Dr. Thomas Fricke, University Kassel - Faculty of Organic Agricultural Sciences, Germany
1687. Dr. Fanny Frick-Trzebitzky, ISOE – Institute for Social-Ecological Research, Germany
1688. Dr. Thomas Friedrich, University of Natural Resources Vienna, Austria
1689. Dr. Friederike Frieß, University of Natural Resources and Life Sciences (BOKU) Vienna, Austria
1690. M.Sc. Barbara Maria Frigione, University of Brescia, Italy
1691. Dr. Nathalie Fromin, CNRS, France
1692. M.Sc. Anna Frieser, University of Wuerzburg, Germany
1693. Dr. Clémentine Frisch, CNRS, France
1694. M.Sc. Antonia Fritz, University of Innsbruck, Austria
1695. Dr. Gabriele Gadermaier, Paris Lodron University Salzburg, Austria
1696. Dr. Heinz Fuchsig, healthforfuture Austria, Austria
1697. Dr. David Fuentes Delgado, Ecology Department, Universidad de Alicante, Spain
1698. Dr. Javier Fuertes-Aguilar, Real Jardín Botánico, CSIC, Spain
1699. M.Sc. Juliette Gaab, CIRAD, France
1700. Prof. Claire GACHON, Museum National d'histoire naturelle, France
1701. Dr. Alec Gaidet, Cirad, France
1702. Dr. Cesare Galetto, Istituto di Ricerca per la Bioeconomia (IRBi), Italy
1703. Dr. Antonio G. Valdecasas, Museo Nacional de Ciencias Naturales, CSIC, Spain
1704. Dr. Clémentine Frisch, CNRS, France
1705. M.Sc. Mathias Gaillard, Oxao, France
1706. Dr. Maxime Galan, INRAE, France
1729. Prof. Dr. ANTONIO GALAN DE MERA, Universidad San Pablo-CEU, Madrid, Spain
1730. Prof. Diana Maria Paola Galassi, University of L'Aquila, Italy
1731. Prof. Marzio Galeotti, University of Milan Department of Environmental Science and Policy, Italy
1732. Dr. Thomas Galewski, Tour du Valat research institute, France
1733. Prof. Andrea Galimberti, University of Milano - Bicocca, Italy
1734. Gabriella Gall, University of Konstanz, Germany
1735. Dr. Cara Gallagher, University of Potsdam, Germany
1736. Prof. Dr. Antonio Gallardo, Universidad Pablo de Olavide, Spain
1737. Heinz GALLAUN, Joanneum Research, Austria
1738. Dr. Juan Gallego-Zamorano, Sovon, Dutch Centre for Field Ornithology, Nijmegen, The Netherlands, Netherlands
1739. Dr. Sébastien GALLLET, Université de Brest, France
1740. Prof. Andrea Galli, Università Politecnica delle Marche, Italy
1741. Dr. Jannicke Gallinger, Swedish University of Agricultural Sciences, Sweden
1742. Dr. Nicolas Gallois, CNRS, France
1743. PhD Brigida Gallone, Naturalis Biodiversity Center, Netherlands
1744. Dr. Nicolas Galtier, ISEM - CNRS - Univ Montpellier - IRD, France
1745. Dr. Dobromil Galvánek, Institute of Botany, Plant Science and Biodiversity Center, Slovak Academy of Sciences, Banská Bystrica, Slovakia, Slovakia
1746. Dr. Sara Gamboa, Universidad Complutense de Madrid, Spain
1747. Dr. João Gameiro, BIOPOLIS | CIBIO, Portugal
1748. Dr. Anna Gamero, Czech Society for Ornithology, Austria
1749. Dr. laurence gamet-payrastre, inrae, France
1750. Dr. Niza Gamez Tamariz, Universidad Nacional Autónoma de México, México
1751. Dr. Martin Gammell, Atlantic Technological University, Ireland
1752. Dr. Manuela Gamsjäger, University for Teacher Education Upper Austria, Austria
1753. Dr. Guila ganem, CNRS U. montpellier, France
1754. PhD Benoit Gangloff, BG Biodiversité, France
1755. Dr. Laura Gangoso, Complutense University of Madrid, Faculty of Biological Sciences, Department of Biodiversity, Ecology and Evolution, Spain
1756. M.Sc. Carol Jomara Gantes Gutiérrez, PREN, Panamá
1757. PhD Andrea Ganthaler, University of Innsbruck, Austria
1758. Dr. Sonja Gantioler, Eurac Research, Italy
1759. Dr. Cristina Ganuza Vallejo, University of Wuerzburg, Germany
1760. Prof. Silvia Garagna, University of Pavia, Italy
1761. Prof. Laszlo Zsolt Garamszegi, Centre for Ecological Research, Hungary
1762. Prof. Dr. Daniel García, University of Oviedo, Spain
1763. Dr. Marina García Alfonso, Conservation Biology Department at Doñana Biological Station, Spain
1764. M.Sc. Oriol García Antúnez, University of Copenhagen, Denmark
1765. M.Sc. Ana García Bautista, Independent experto consultant, Spain
1766. Prof. Emili Garcia Berthou, University of Girona, Spain
1767. Dr. Thaís Garcia da Silva, Federal University of São Carlos, Brazil
1768. PhD Inaki Garcia de Cortazar, INRAE, France
1769. Prof. Dr. Diego García de Jalón, Universidad Politécnica de Madrid, Spain
1770. Dr. Eladio García de la Morena, Biodiversity Node, Spain
1771. Dr. Fernando García del Pino, Universitat Autònoma de Barcelona, Spain
1772. PhD Clara García i Co, University of Antwerp, Belgium
1773. PhD Ana García Juanatey, CEI International Affairs, Spain
1774. Dr. Maria García Martin, Swiss Federal Institute for Forest, Snow and Landscape Research WSL, Switzerland
1775. Dr. Pablo García Palacios, CSIC, Spain
1776. PhD Adrian García-Rodriguez, University of Vienna, Austria
1777. PhD Alberto García-Rodríguez, Universidad de León, Spain
1778. Dr. Manuel Garcin, BRGM, France
1779. Dr. Nino Gardoni, National Center for Veterinary Toxicological Information, France
1780. Dr. Mª Teresa Garna, Botanical Institute of Barcelona, Spain
1781. Dr. Alexandre GARNIER, Parc national des Pyrénées, France
1782. Dr. Jeanne GARRIC, Emeritus Inrae, Retired, France
1783. Prof. Dr. FRANCISCO GARRIDO, Universidad Pablo de Olavide Sevilla / Universidad de Jaén, Spain
1784. Sven Gärtner, ifeu - Institut für Energie- und Umweltforschung Heidelberg gGmbH, Germany
1785. PhD Andrea Garvetto, Universität Innsbruck, Austria
1786. M.Sc. David Gasc, CIHEAM, France
1787. Prof. Didier Gascuel, Institut Agro, France
1788. Prof. Giuliano Gasperi, Dept Biology & Biotechnology - University of Pavia, Italy
1789. PhD Cristina Gasperini, University of Florence, Italy
1790. Dr. Pierre Gasselin, INRAE, France
1791. M.Sc. Mélanie Gastellier, UNamur, Belgium
1792. M.Sc. Ioannis Gasteratos, Freelance Forester - Environmentalist, Manager of Protected Areas, Greece
1793. Dr. Veronika Gaube, University of Natural Resources and Life Sciences, BOKU Vienna, Austria
1794. Dr. Stéphanie Gaucherand, INRAE, France
1795. PhD Corentin Gaudichet, UMR 7324 CITERES (CNRS - Université de Tours), France
1796. Dr. Bertrand Gauffre, INRAE, France
1797. Dr. Jennifer Gaughran, Dublin City University, Ireland
1798. Prof. Dr. Thierry Gauquelin, IMBE Aix Marseille University, France
1799. Dr. Michel Gauthier-Clerc, University of Geneva, France
1800. Dr. Santiago Gaviria Melo, University of Vienna, Austria
1801. Ioanna Gavrilidi, University of Antwerp, Belgium
1802. Prof. Dr. Erik Gawel, Helmholtz Centre for Environmental Research, Germany
1803. M.Sc. Marc Gayot, ARB, France
1804. Dr. Antoine Gazeix, Tour du Valat, France
1805. Dr. Csongor Gedeon, Institute for Soil Sciences of Hungary, Hungary
1806. M.Sc. Luna Geerts, University of Antwerp, Belgium
1807. Dr. Patricia Geesink, Wageningen University and Research, Netherlands
1808. Dr. Manuel Emilio Gegúndez Arias, Universidad de Huelva, Spain
1809. M.Sc. Teresa Geidel, Fresh Thoughts Consulting, Germany
1810. Dr. Matthias Geiger, Leibniz Institute for the Analysis of Biodiversity Change, Germany
1811. Dr. Klaus Peter Geigle, German Aerospace Center (DLR), Germany
1812. Dr. Stefan Geisen, Wageningen University, Netherlands
1813. Dr. Gesa Geißler, University of Life Sciences and Natural Resources Vienna, Austria
1814. Dr. Katja Geißler, University of Potsdam, Germany
1815. PhD Stav Gelber, FU Berlin, Germany
1816. Dr. Jonas Geldmann, Center for Macroecology, Evolution and Climate, University of Copenhagen, Denmark
1817. Prof. Dr. Birgit Gemeinholzer, University Kassel, Germany
1818. Dr. József Geml, Eötvös Loránd Research Network, Hungary
1819. Dr. Michel Génard, INRAE, France
1820. Prof. Davide Geneletti, University of Trento, Italy
1821. Dr. Alexandre Génin, Copernicus Institute for Sustainable Development, University of Utrecht, Utrecht, Netherlands
1822. Dr. Anne GENISSEL, INRAE, France
1823. PhD Sandra Gentin, University of Copenhagen, Denmark
1824. Dr. George George Petihakis, HCMR, Greece
1825. Dr. Maxime Georges des Aulnois, EENNOVAE, France
1826. Dr. Panagiotis Georgiakakis, Natural History Museum of Crete, University of Crete, Greece
1827. Dr. Georgios Georgios Kotoulas, Hellenic Centre for Marine Research, Greece
1828. Dr. Costanza Geppert, University of Padova, Italy
1829. Dr. Pierre GERARD, AgroParisTech (University Paris-Saclay), France
1830. Dr. Maxence Gérard, Stockholm University, Sweden
1831. Dr. Gerard Gerard Oostermeijer, Institute for Biodiversity and Ecosystem Dynamics, University of Amsterdam, Netherlands
1832. Dr. Rémi GERBER, Office français de la biodiversité, France
1833. Dr. Sophie Gerber, inrae, France
1834. Prof. Marco Gerdol, University of Trieste, Italy
1835. Dr. Barbara-Amina Gereben_Krenn, Department of Evolutionary Biology, University of Vienna, Austria
1836. Dr. Christoph Gerhards, School of Energy Systems, LUT University, Yliopistonkatu 34, 53850 Lappeenranta, Finland, Germany
1837. PhD Karin Gerhardt, Swedish University of Agricultural Sciences, Sweden
1838. Dr. Alina Gerlédé, University of Warsaw, Poland
1839. M.Sc. Hannah Sprine Gerlich, Aarhus University, Denmark
1840. Dr. Arno Germond, INRAE, France
1841. Dr. Nadine Gerner, Emschergenossenschaft/Lippeverband, Germany
1842. Gijs Gerrits, Wageningen University & Research, Netherlands
1843. PhD Mathieu Gervais, EGIS (engineering and consultancy in coastal management), France
1844. PhD Nicole Gervais, University of Groningen, Netherlands
1845. Dr. Eugenio Gervasini, Joint Research Center European Commission, Italy
1846. Dr. Benoît Geslin, Mediterranean Institute of Ecology and Biodiversity (IMBE), France
1847. PhD Gizachew Tarekegn Getahun, Swedish University of Agricultural Sciences, Sweden
1848. Prof. Dr. Michael Getzner, Vienna University of Technology (TU Wien), Austria
1849. M.Sc. Verena Gfrerer, AG Haus der Natur Salzburg, Austria
1850. M.Sc. Jana Gheuens, Brussels School of Governance, Belgium
1851. M.Sc. Dominique Ghiselinck, University of Antwerp, Belgium
1852. PhD Ioan Ghira, Babes-Bolyai University, Romania
1853. M.Sc. MARIASILVIA GIAMBERINI, National Research Council of Italy, Italy
1854. PhD Daniele Giannetti, University of Parma, Italy
1855. Prof. Giacomo Giannoccaro, University of Bari Aldo Moro, Italy
1856. Dr. Corentin Gibert, Georgia Institute of Technology, USA
1857. Prof. Dr. Eduardo L. H. Giehl, Federal University of Santa Catarina, Brazil
1858. PhD Marie-Charlotte Gielten, Catholic University of Louvain, Belgium
1859. PhD Marek Giergiczny, iDiv, Germany
1860. Dr. Ariane Gisriegl, FH Technikum, Austria
1861. Dr. Brice Giffard, UMR 1065 SAVE Santé et Agroécologie du Vignoble INRAE - Bordeaux Sciences Agro, France
1862. Dr. Jacques Gignoux, CNRS, France
1863. Dr. Artur Gil, University of the Azores, Portugal
1864. Dr. Diego Gil, Museo Nacional de Ciencias Naturales (CSIC), Spain
1865. Prof. Daniel Gilbert, Université de franche comté, France
1866. Dr. Francis Gilbert, University of Nottingham, United Kingdom
1867. Dr. Franck Gilbert, CNRS, France
1868. PhD Lola Gilbert, La Rochelle University, France
1869. Dr. Jose Antonio Gil-Delgado, Honorary Prof. Universidad de Valencia, Spain
1870. Prof. Barbara Giles, Umeå University, Sweden
1871. Prof. Jennifer Gill, University of East Anglia, United Kingdom
1872. M.Sc. Loïc Gillerot, Ghent University, Belgium
1873. M.Sc. Marc Gilles, Bielefeld University, Germany
1874. Prof. Dr. François Gillet, Université de Franche-Comté, France
1875. Dr. Mark Gillingham, Max-Planck Institute for Biological Intelligence, Germany
1876. Prof. Emmanuelle Gilot-Fromont, UMR LBBE, CNRS Univ Lyon 1 VetAgro Sup, France
1877. Dr. Graciela Gil-Romera, Instituto Pirenaico de Ecologia-CSIC, Spain
1878. Prof. Dr. Andrés Giménez, Universidad Miguel Hernández, Spain
1879. Prof. María Giménez Casaduero, Universidad de Murcia, Spain
1880. Dr. France Gimmich, Leibniz Institute for the Analysis of Biodiversity Change (LIB), Germany
1881. Prof. Sinos Giokas, Department of Biology, University of Patras, Greece
1882. Dr. Lucia Giorgetti, IBBA, CNR, Italy
1883. IOANNIS GIOVOS, iSea, Environmental Organisation for the Preservation of the Aquatic Ecosystems, Greece
1884. PhD Giorgia Girardi, University of Naples Federico II, Italy
1885. Dr. Camille Girard-Tercieux, Unemployed, France
1886. Prof. Tatiana Giraud, CNRS, Université Paris Saclay, France
1887. Prof. Patrick Giraudoux, University of Franche-Comté, France
1888. Prof. Dr. Carmela Gissi, University of Bari, Italy
1889. Dr. Dimitri Giunchi, University of Pisa, Italy
1890. M.Sc. Justina Givens, IRD, France
1891. M.Sc. Michael Glaser, University of Vienna, Austria
1892. PhD Peter Glasnović, University of Primorska, Slovenia
1893. Dr. Christoph Glawe, Wpd Onshore, Germany
1894. Dr. Sylvain Glemin, Cnrs, France
1895. Dr. Mariana Gliesch Silva, University of Amsterdam, Netherlands
1896. Dr. Jenny Anne Glimskär, Swedish University of Agricultural Sciences, Sweden
1897. Dr. Robert Gliniars, University of Hohenheim, Germany
1898. Dr. Daniel Gliskman, TU Dresden, Germany
1899. Dr. Gabriele Gloder, KU Leuven, Belgium
1900. Dr. Martyna Glodowska, Radboud University, Netherlands
1901. Dr. Tiziana Gobbin, Hasselt University, Belgium
1902. PhD Erik Gobbo, Swedish Museum of Natural History, Sweden
1903. M.Sc. Norman Göbeler, University of Helsinki, Finland
1904. Dr. Sandrine Godefroid, Meise Botanic Garden, Belgium
1905. PhD Carlos Godinho, Universidade de Évora, Portugal
1906. M.Sc. Delfina Godinho, Instituto Superior de Agronomia, Portugal
1907. Prof. Dr. Malgorzata Godlewska, European Regional Centre for Ecohydrology of the Polish Academy of Sciences, Poland
1908. Dr. José A. Godoy, Estación Biológica de Doñana, CSIC, Spain
1909. Dr. Oscar Godoy, Universidad de Cádiz, Spain
1910. Prof. Dr. Ewa Joanna Godzińska, Laboratory of Ethology, Nencki Institute of Experimental Biology PAS, Warsaw, Poland
1911. Dr. Florian Goedecke, University of Goettingen, Germany
1912. Dr. Diana Goertzen, TU Braunschweig, Germany
1913. Prof. Dr. Peter Goethals, Ghent University, Belgium
1914. PhD Tomáš Goga, Institute of Geography, Slovak Academy of Sciences, Slovakia
1915. Dr. Maria Golab, Institute of Nature Conservation, Poland
1916. M.Sc. Florian Goldschmeding, Maastricht University, Netherlands
1917. Dr. Bartłomiej Goldyn, Adam Mickiewicz University, Poznań, Poland
1918. Dr. Edgar Göll, IZT - Institute for Future Studies and Technology Assessment, Germany
1920. Dr. Ángela Gómez, Goe3BCN - CSIC, Spain
1921. Prof. Dr. Pilar Gómez-Ramírez, University of Murcia, Spain
1922. Dr. Miguel Angel Gómez-Serrano, Department of Microbiology and Ecology, University of Valencia, Spain
1923. Prof. Emanuel Gonçalves, MARE-ISPA, Portugal
1924. Prof. José Gonçalves, University of Porto, Science Faculty, Portugal
1925. Andrei Gornev, CEFE CNRS, France
1926. M.Sc. Sophie Gontier, University Paris Cité, France
1927. Dr. Jean-François González, Université Claude Bernard Lyon 1, France
1928. Dr. Odette Gonzalez, WI, Belgium
1929. PhD José M. González, Universidad Rey Juan Carlos, Spain
1930. Dr. Ignacio González, CIEMAT, Spain
1931. Dr. Santiago GONZALEZ MARTINEZ, INRAE, France
1932. Dr. Penélope GONZÁLEZ-SAMPÉRIZ, PYRENEAN INSTITUTE OF ECOLOGY, Spain
1933. Prof. Acaimo González Reyes, Spanish National Research Council (CSIC), Spain
1934. Dr. PENÉLOPE GONZÁLEZ-SAMPÉRIZ, PYRENEAN INSTITUTE OF ECOLOGY, Spain
1935. Prof. Dr. Maja Göpel, Leuphana University, Germany
1936. M.Sc. Tomaz Gorenc, Institute for Health and Environment, Slovenia
1937. Dr. Gregor Gorkiewicz, Medical University of Graz, Austria
1938. Prof. Mike Gormally, University of Galway, Ireland
1939. PhD Courtney Gorman, Trinity College Dublin, Ireland
1940. Dr. Irina Gorodetskaya, CIIMAR - Interdisciplinary Centre of Marine and Environmental Research of the University of Porto, Portugal
1941. Dr. Jamie Gorzynski, University of Edinburgh, United Kingdom
1942. Prof. Dr. Nils Goseberg, Technische Universität Braunschweig, Germany
1943. Dr. Brigitte Gottsberger, University of Vienna, Austria
1944. Dr. Klaus-Dieter Gottschaldt, Deutsches Zentrum für Luft- und Raumfahrt (DLR), Germany
1945. Dr. Eckhard Gottschalk, Georg-August University of Göttingen, Johann Friedrich Blumenbach Institute of Zoology and Anthropology, Conservation Biology, Germany
1946. Dr. Sarah Gottwald, Leuphana University, Germany
1947. Dr. Lars Götztenberger, Czech Academy of Sciences, Institute of Botany, Czech Republic
1948. Dr. Pierre Goubet, GEOLAB Université Clermont Auvergne (membre associé), France
1949. Dr. Nicolas Gouix, Conservatoire d'espaces naturels Occitanie, France
1950. Prof. Dr. Daniel GOUJET, Museum national d'Histoire naturelle, France
1951. M.Sc. Thomas Goulding, MARE- Marine and Environmental Science Centre- UL, Portugal
1952. M.Sc. Philippe GOURDAIN, UAR PatriNat (OFB-CNRS-MNHN-IRD), France
1953. Dr. Louis Gourlez de la Motte, Natagriwal ASBL, Belgium
1954. Dr. Véronique Gouy Boussada, INRAE, France
1955. Prof. Pierre-Henri Gouyon, Muséum National d'Histoire Naturelle, France
1956. Dr. Sanne Govaert, Agentschap voor Natuur en Bos, Belgium
1957. Dr. Laura Govers, University of Groningen | NIOZ, Netherlands
1958. Prof. Dr. Wolfgang Goymann, Max Planck Institute for Biological Intelligence, Germany
1959. M.Sc. Harald Grabher, University of Natural Resources and Life Sciences, Austria
1960. Dr. Daniel Grabner, University of Duisburg-Essen, Germany
1961. Prof. Dr. Manuel A.S. Graça, University of Coimbra, Portugal
1962. M.Sc. Giulia Graldi, Department of Civil, Environmental and Mechanical Engineering, University of Trento, Italy, Italy
1963. Dr. Philipp Gramlich, Stichting Turfvrij, Netherlands
1964. Prof. Dr. Thorsten Grams, Technical University of Munich, Germany
1965. Dr. Philippe Grandcolas, CNRS (Centre National de la Recherche Scientifique), France
1967. PhD Ulf Grandin, Swedish University of Agricultural Sciences, Sweden
1968. Dr. Marie-Pierre Granger, Central European University, Austria
1969. Prof. Dr. Ingo Grass, University of Hohenheim, Germany
1970. Dr. Rüdiger Graß, University of Kassel, Germany
1971. Prof. Dr. Donato Antonio Grasso, University of Parma, Italy
1972. Prof. Marion Grau, MF Norwegian School of Theology, Religion and Society, Germany
1974. Dr. Markus Grebenstein, DLR, Germany
1975. Prof. Michael D. Greenfield, CNRS UMR 9197, Université de Lyon/Saint-Etienne, 42023 Saint Etienne, France
1976. M.Sc. Konstantin Gregor, Technical University of Munich, Germany
1977. Dr. Matjaž Gregorič, Research Centre of the Slovenian Academy of Sciences and Arts, Slovenia
1978. PhD Inês Gregório, University of Porto, Portugal
1979. Prof. Dr. Irmgard Greilhuber, Department of Botany and Biodiversity Research, University of Vienna, Austria
1980. Dr. Josef Greimler, University of Vienna (retired), Austria
1981. PhD Caroline Greiser, Stockholm University, Sweden
1982. PhD Paola Grenni, Water Research Institute, National research Council, Italy
1983. Prof. Richard Grenyer, University of Oxford, United Kingdom
1984. Prof. Tomáš Grim, University of Ostrava, Czech Republic
1985. Dr. Ilena Grimmer, Hydrogen research, Austria
1986. Dr. Angela Grimmer, Paderborn University, Germany
1987. Dr. Manuel Grivet, Chrono-environnement Lab, University of Franche-Comte, France
1988. Dr. Hanne Grobe, Alfred-Wegener-Institut Helmholtz-Zentrum für Polar- und Meeresforschung, Germany
1989. Dr. Lisanne Groen, Open Universiteit, Belgium
1990. Dr. Thimo Groffen, University of Antwerp, Belgium
1991. Dr. Quentin Groom, Meise Botanic Garden, Belgium
1992. Dr. Jeroen Groot, WUR, Netherlands
1993. Prof. Ton Groothuis, University of Groningen, Netherlands
1994. M.Sc. Clément Gros, INRAE, France
1995. Dr. Rita Grosch, Leibniz Institute of Vegetable and Ornamental Crops (IGZ) e.V., Germany
1996. M.Sc. Lisa Grosfeld, Alfred Wegener Institute, Germany
1997. Prof. Dr. Elisabeth Gross, LIEC UMR 7360 CNRS; Université de Lorraine, France
1998. Dr. Karin Gross, Paris Lodron University of Salzburg, Austria
1999. Prof. Dr. Hans-Peter Grossart, Leibniz Institute of Freshwater Ecology and Inland Fisheries (IGB) & Potsdam University, Germany
2000. Prof. Dr. Ivo Grosse, Martin Luther University, Germany
2001. Dr. Meike Grosse, Research Institute of Organic Agriculture FiBL, Switzerland
2002. Dr. Katharina Groß-Vogt, Universität für Musik und darstellende Kunst Graz, Austria
2003. Dr. Stefanie Grosswendt, Berlin Institute of Health at Charité, Germany
2004. Kyle Grotens, Rewilding Europe, Spain
2005. Dr. Sabine Grube, Naturschutzstiftung Deutsche Ostsee OSTSEESTIFTUNG, Germany
2006. Gabriel Gruber, University of Natural Ressources and Life Sciences, Vienna, Department of Water, Atmosphere and Environment, Institute of Hydrobiology and Aquatic Ecosystem Management, Gregor-Mendel-Straße 33/DG, 1180 Vienna, Austria
2007. Dr. Martin U. Grüebl, Swiss Ornithological Institute, Switzerland
2008. Prof. Marc-Eric Gruénais, Université de Bordeaux, France
2009. PhD Mario Gründlinger, Universität Innsbruck, Austria
2010. M.Sc. Jan Grünwald, Institute for Environmental Studies, Faculty of Science, Charles University in Prague, Czech Republic, Czech Republic
2011. Dr. Veronika Grymová, veterinary practitioner, Czech Republic
2012. Joanna Grzymała-Moszczyńska, University Jagiellonian, Poland
2013. Dr. Alena Gsell, NIOO-KNAW, Netherlands
2014. M.Sc. Qiaolin Gu, TUM, Germany
2015. M.Sc. Lorena de Jesus Guardia Velarde, SLU, Sweden
2016. PhD Elia Guariano, Eurac Research, Italy
2017. PhD Bertrand Guatarbes, CNRS, France
2018. Dr. Ester Gubi, Karolinska Institutet, Sweden
2019. PhD Laurent Guéguen, Université Lyon 1, France
2020. Dr. Borisлав Guerguev, National Museum of Natural History Sofia, Bulgaria
2021. Franziska Guepner, free-lance for Federation of German Avifaunists, Malta
2022. M.Sc. Naret Guerrero, Technical University of Munich, Germany
2023. M.Sc. María Guerrero Campos, Universidad de Málaga, Spain
2024. Dr. Mareike Gueth, German Environment Agency, Germany
2025. Dr. Daniela Guicking, University Kassel, Germany
2026. Prof. Gianni Guidetti, University of Pavia, Italy
2027. Prof. Marcello Guiducci, University of Perugia, Italy
2028. Prof. Roderic Guizar, Center for Genomic Regulation, Spain
2029. M.Sc. Colin Guilfoyle, Atlantic Technological University, Ireland
2030. PhD Joao GUILHERME, Independent Researcher, France
2031. Dr. Christian Guill, University of Potsdam, Germany
2032. Dr. Jean Guillard, INRAE, France
2033. Dr. Joannès Guillemot, CIRAD, France
2034. PhD Emmanuel Guillaud, GFZ, Potsdam, Germany
2035. M.Sc. Théo Guillox, UMR AGAP Institut, CIRAD, France
2036. Dr. fanny guillet, CNRS, France
2037. Yvon GUILLEVIC, Association (ONG) Bretagne Vivante, France
2038. PhD Bruno GUINAND, Institut des Sciences de l'Evolution de Montpellier - Université de Montpellier, France
2039. Dr. Benjamin Guinet, UCBL1, France
2040. M.Sc. Nuno Guiomar, MED - Mediterranean Institute for Agriculture, Environment and Development & CHANGE - Global Change and Sustainability, University of Évora, Portugal
2041. PhD Carmen Guiote, CIDE-CSIC, Spain
2042. Prof. Antoine Guisan, University of Lausanne, Switzerland
2043. Prof. Dr. Stefan Gumhold, TU Dresden, Germany
2044. Dr. Anke Günther, University of Rostock, Landscape Ecology, Germany
2045. M.Sc. Markus Günther, Technische Universität Berlin, Germany
2046. M.Sc. Lukas Günther, Leipzig University, Germany
2047. M.Sc. Anton Güntsch, Freie Universität Berlin, Botanic Garden and Botanical Museum Berlin, Germany
2048. Prof. Kirsti Pedersen Gurholt, Norwegian School of Sport Sciences, Norway
2049. Camilla Gustafsson, University of Helsinki, Finland
2050. PhD Eva Gustavsson, University of Gothenburg, Sweden
2051. Marco Guzini, Lipu, Italy
2052. Cordula Gutekunst, University of Greifswald, Germany
2053. Dr. Gábor Guti, Széchenyi István University, Hungary
2054. Dr. Cayetano Gutiérrez-Cánovas, Rey Juan Carlos University, Spain
2055. Dr. Carlos Gutiérrez-Expósito, Estacion Biologica de Doñana (CSIC), Spain
2056. Dr. Hervé Guyomard, INRAE, France
2057. Dr. Jaromir Guzinski, Animal and Plant Health Agency, United Kingdom
2058. Prof. Janusz Guziur, UWM Olsztyn pl, Poland
2059. Prof. Dr. Gloria Isabel Guzmán Casado, Pablo de Olavide University, Spain
2060. M.Sc. Adrienn Gyalus, Eötvös Loránd University, Department of Plant Systematics, Ecology and Theoretical Biology, Hungary
2061. Dr. Thomas Haaland, Norwegian University of Science and Technology, Norway
2062. Dr. Willi Haas, University of Natural Resources and Life Sciences, Vienna (BOKU), Austria
2063. Dr. Wolfgang Haas, Rechtswissenschaftliche Fakultät, Universität Wien, Austria
2064. Prof. Dr. Martin Haase, University of Greifswald, Germany
2065. Prof. Dr. Peter Haase, Senckenberg Gesellschaft für Naturforschung, Germany
2066. M.Sc. Bettina Habelt, TU Dresden, Germany
2067. Prof. Dr. Helmut Haberl, Institute of Social Ecology, University of Natural Resources and Life Sciences, Vienna, Austria
2068. M.Sc. Axel Hacala, Université de Rennes, ECOBIO, France
2069. Prof. Dr. Jochen Hack, Leibniz Universität Hannover - Institut für Umweltplanung, Germany
2070. Dr. Jan Hackel, Universität Marburg, Germany
2071. Prof. Dr. Branimir Hackenberger, SCIOM, Croatia
2072. Dr. Thomas Hackl, University of Groningen, Netherlands
2073. PhD Gabriele Hadl, Kwansei Gakuin U. (Japan), Alpen-Adria U. Klagenfurt (Österreich), Austria
2074. Dr. Matthieu Haefele, Centre National de la Recherche Scientifique (CNRS), France
2075. Dr. Blrgen Haest, Swiss Ornithological Institute, Switzerland
2076. Dr. Gregor Hagedorn, Museum für Naturkunde Berlin, Germany
2077. Prof. Dr. Carmen Hagemeister, TU Dresden, Germany
2078. Dr. Oskar Hagen, German Centre for Biodiversity Research, Germany
2079. Dr. Martin Hagnmüller, Graz University of Technology, Austria
2080. Prof. Thomas Hahn, Stockholm University, Sweden
2081. Prof. Dr. Sylvia Haider, Leuphana University of Lüneburg, Germany
2082. Dr. Gertrud Haidvogl, University of Natural Resources and Life Sciences Vienna, Austria
2083. Dr. Sebastian Hainzl, GFZ German Research Centre for Geosciences, Germany
2084. Dr. Christa Hainz-Renetzeder, University of Natural Resources and Life Sciences, Vienna, Austria
2085. Dr. Petra Hajkova, Institute of Vertebrate Biology, Czech Academy of Science, Czech Republic
2086. Dr. Viola Hakkarainen, Helsinki Institute of Sustainability Science, Finland
2087. PhD Melinda Halassy, Centre for Ecological Research, Institute of Ecology and Botany, Hungary
2088. Tuulikki Halla, University of Eastern Finland
2089. Dr. Moritz Hallama, Universität Hohenheim, Germany
2090. PhD Günter Haller, university of vienna, Austria
2091. Prof. John Halley, University of Ioannina, Greece
2092. Dr. Heidi Hällfors, Finnish Environment Institute, Finland
2093. Dr. Maria Hällfors, Finnish Environment Institute, Finland
2094. Dr. Lea Hallik, University of Tartu, Estonia
2095. Dr. Lucyna Halupka, University of Wrocław, Poland
2096. Dr. Bettina Hamann, Technische Universität Berlin, Germany
2097. Dr. Arndt Hampe, INRAE, France
2098. M.Sc. Dihui Han, Maastricht University, Netherlands
2099. Dr. Sungju Han, Helmholtz Centre for Environmental Research - UFZ, Germany
2100. Dr. Pascale Hancart Petitet, Institut de Recherche pour le Développement (IRD) TransVIHMI (Université de Montpellier, IRD, INSERM), France
2101. Dr. Yves Handrich, Centre National de la Recherche Scientifique (UMR7178-CNRS-UniStra) Strasbourg-France
2102. Susanne Hanger-Kopp, International Institute for Applied Systems Science, Austria
2103. PhD Deepak Hanike Basavegowda, Leibniz-Institut für Agrartechnik und Bioökonomie e.V. (ATB), Potsdam, Germany
2104. Prof. Dr. Michael Hanke, Forschungszentrum Jülich and Heinrich Heine Universität Düsseldorf, Germany
2105. Prof. Dr. Jari Hänninen, University of Turku, Finland
2106. PhD Anja Hansen, Leibniz Institute for Agricultural Engineering and Bioeconomy (ATB), Germany
2107. Line Vinther Hansen, University of Copenhagen, Denmark
2108. Prof. Dr. Rieke Hansen, Hochschule Geisenheim, Germany
2109. PhD Rikke Hansen, Aarhus University, Denmark
2110. Sebastian Hanß, University of Goettingen, Germany
2111. PhD Jan Hanzelka, Charles University, Czech Republic
2112. Dr. Réka Haranginé Lukács, Institute for Geological and Geochemical Research Center for Astronomy and Earth Sciences, Hungary
2113. Dr. Alwin Hardenbol, Swedish University of Agricultural Sciences, Sweden
2114. M.Sc. Adam Harding, The University of Edinburgh, United Kingdom
2115. Dr. Judith Nora Hardt, Centre Marc Bloch, Germany
2116. Prof. Dr. Werner Härdtle, Leuphana University Lüneburg, Institute of Ecology, Universitätsallee 1, 21335 Lüneburg, Germany
2117. M.Sc. Valesca Harezlak, Deltas, Netherlands
2118. PhD Zuzana Harmackova, Global Change Research Institute of the Czech Academy of Sciences, Stockholm Resilience Centre, Czech Republic
2119. Dr. Tristan Harmel, Magellium, France
2120. Prof. Dr. Bianca Harms, NHL Stenden University of applied sciences, Netherlands
2121. Philip Harms, Leibniz Institute of Ecological Urban and Regional Development (IOER), Germany
2122. M.Sc. Sylvana Harmsen, Wageningen University, Netherlands
2123. M.Sc. Annika Harr, TUM, Germany
2124. Gabriele Harrer-Puchner, System Logics T.T. GmbH, Germany
2125. M.Sc. Anne Harrison, Wildfowl & Wetlands Trust, United Kingdom
2126. PhD Dorottya Hárságyi, PTE-TTK, Hungary
2127. Dr. Juliane Hartke, Johannes Gutenberg Universität Mainz, Germany
2128. Dr. Hella Hartmann, TU Dresden, Germany
2129. Dr. Harald Haseke, Freelancer, Austria
2130. Dr. Ute Hasenöhrl, University of Innsbruck, Austria
2131. Prof. Dr. Michaela Hau, Max Planck Institute for Biological Intelligence, Germany
2132. Dr. Judith Hauck, Alfred-Wegener-Institut, Helmholtz-Zentrum für Polar- und Meeresforschung, Germany
2133. Dr. Annabelle Haudry, University of Lyon, France
2134. Dr. Benedikt Haug, Wageningen University, The Netherlands, Centre for Crop Systems Analysis and Plant Production Systems, Netherlands
2135. M.Sc. Johannes Hausharter, University of Vienna, Austria
2136. Prof. Dr. Nina Hautekèete, University of Lille, France
2137. Dr. Yann Hautier, Utrecht University, Netherlands
2138. Dr. Alexander Haverkamp, Wageningen University, Netherlands
2139. Dr. Charlotte Havermans, Alfred Wegener Institute, Germany
2140. PhD Jan Havlíček, University of South Bohemia, Czech Republic
2141. Prof. Matt Hayward, University of Newcastle, Australia
2142. Prof. Fangliang He, University of Alberta, Canada
2143. M.Sc. Miao He, Utrecht University, Netherlands
2144. PhD Shuiqing He, none, Netherlands
2145. Dr. Grzegorz Hebda, Opole University, Poland
2146. M.Sc. Babette Hebenstreit, University of Applied Sciences Vorarlberg, Austria
2147. PhD Katharina Hecht, Utrecht University, Netherlands
M.Sc. Anna Heck, Belgian Biodiversity Platform - Research Institute Nature and Forest, Belgium

Dr. Susanne Hecker, Museum für Naturkunde - Leibniz Institute for Evolution and Biodiversity Science, Germany

PhD Barbro Hedmark, Örebro University, Sweden

Dr. Philipp Heeb, CNRS, France

Prof. Dr. Tobias Heed, University of Salzburg, Austria

Prof. Dr. Katrin Heer, Albert-Ludwigs Universität Freiburg, Germany

Prof. Dr. Petra Heffeter, Center for Cancer Research, Austria

Dr. Mariet Hefting, Ecology and Biodiversity Group, Institute of Environmental Biology, Utrecht University, the Netherlands

Prof. Hans-Christian Hege, Zuse Institute Berlin (ZIB), Germany

Prof. Dr. Ute Hegenbart, University Hospital Heidelberg, Germany

M.Sc. Zsolt Hegyeli, Milvus Group Bird and Nature Protection Association, Romania

Dr. Lea Heidrich, University of Marburg, Germany

Dr. Maija Heikkilä, University of Helsinki, Finland

Prof. Hannu Heikkinen, University of Jyväskylä, Finland

Dr. Risto Heikkinen, Finnish Environment Institute, Finland

Prof. Dr. Stefan Heiland, Technische Universität Berlin, Fachgebiet Landschaftsplanung, Germany

Prof. Dr. Katharina Heimerl, Universität Wien, Austria

Prof. Dr. Lars Hein, Wageningen University, Netherlands

Dr. Michael Hein, Leuphana University Lüneburg, Germany

Prof. Dr. Thomas Hein, University of Natural Resources and Life Sciences, Vienna, Austria

M.Sc. Janina Heinen, Swedish University of Agricultural Sciences, Sweden

Dr. Robin Heinen, Technical University of Munich, Germany

Dr. Charlotte Heinrich, german, Germany

Dr. Jan-Hendrik Heinrichs, Forschungszentrum Jülich & RWTH Aachen, Germany

M.Sc. Julia Heintz, SciLifeLab, Sweden

M.Sc. Wilfried Heintz, Inrae, France

Prof. Dr. Susanne Heise, HAW Hamburg, Germany

M.Sc. Johannes Heisterberg, Wageningen University and research, Netherlands

Dr. Ignas Heitkönig, Wageningen University, Netherlands

Dr. Jobst Heitzig, Potsdam Institute for Climate Impact Research, Germany

Dr. Marjo Helander, Department of Biology, University of Turku, Finland

M.Sc. Magdalena Held, University of Helsinki, Finland

Prof. Ruben Heleno, University of Coimbra, Portugal

PhD Anatol Helfenstein, Wageningen University and Research, Netherlands

Dr. Julian Helfenstein, Wageningen University, Netherlands

M.Sc. Janne Heliola, Finnish Environment Institute, Finland

Dr. Romy Heller, Deutsches Zentrum für Luft- und Raumfahrt (DLR), Germany

Dr. Martin Hellicar, BirdLife Cyprus, Cyprus

Dr. Seppo Hellsten, Finnish environment institute SYKE, Finland

Dr. Niels Hellwig, Thünen Institute of Biodiversity, Germany

Prof. Aveliina Helm, University of Tartu, Estonia

Prof. Barbara Helm, Swiss Ornithological Institute, Switzerland

Thierry Helminger, Muséé national d'histoire naturelle Luxembourg, Luxembourg

Prof. Heljä-Sisko Helmsaari, University of Helsinki, Dept. of Forest Sciences, Finland

Dr. Lia Hemeirik, Biometris, Wageningen University, Netherlands

PhD Christopher Hempel, KAUST, Canada

Anja Hemschemeier, Ruhr University Bochum, Germany
Dr. Diana Hendrickx, Wageningen University, Netherlands
Prof. Frederik Hendrickx, Royal Belgian Institute of Natural Sciences, Belgium
PhD Wouter Hendrycks, University of Antwerp, Royal Museum for Central Africa, Belgium
Prof. Dr. Klaus Henle, Helmholtz Centre for Environmental Research, Germany
Dr. Elisabeth Henn, UFZ -Leipzig, Germany
M.Sc. Justus Hennecke, German Centre for Integrative Biodiversity Research (iDiv) Halle-Jena-Leipzig, Germany
Dr. Wolfgang Hennig, Ford of Europe, Germany
Prof. Arne Henningsen, University of Copenhagen, Denmark
Dr. Marie V Henriksen, NIBIO, Norway
M.Sc. Margarida Henrique, Gulbenkian Science Institute (IGC), Portugal
Dr. morgane henry, Hellenic Centre for Marine Research, Greece
Prof. Dr. Isabell Hensen, MLU Halle, Germany
Dr. Diane Henshel, Indiana University - Bloomington, IN USA, US
Jörn Hentschel, Herbarium Haussknecht (JE) Jena, Germany

2657. Dr. Réka Kiss, Centre for Ecological Research, Hungary
2658. PhD Valentin Adrian Kiss, University of Antwerp, Belgium
2659. Dr. Veronika Kiss, GreenFormation, Hungary
2660. Prof. Dr. Daniel Kissling, University of Amsterdam, Netherlands
2661. Steffen Kittlaus, TU Wien - Institute for Waterquality and Resourcemanagment, Austria
2662. Prof. Thanasis Kizos, University of the Aegean, Greece
2663. M.Sc. Sigrid Trier Kjer, Norwegian University of Life Sciences, Norway
2664. Prof. Dr. Petter Kjellander, Department of Ecology, Swedish University of Agricultural Sciences, Sweden
2665. Dr. Christine Klaas, Alfred-Wegener-Institut für Polar- und Meeresforschung, Germany
2666. Dr. Johannes Klackl, Paris-Lodron University of Salzburg, Austria
2667. Dr. Björn Klatt, Lund University, Department of Biology, Sweden
2668. Dr. Toni Klauschies, University of Potsdam, Germany
2669. Dr. Lukas Daniel Klausner, St. Pölten University of Applied Sciences, Austria
2670. M.Sc. Fabian Klebl, Leibniz Centre for Agricultural Landscape Research (ZALF), Germany
2671. Dr. Johannes Klackl, Paris-Lodron University of Salzburg, Austria
2673. Dr. Silke Kleinhauer, University of applied science, Germany
2674. David Kleijn, Wageningen University, Netherlands
2675. M.Sc. Noëlle Klein, Agroscope / ETH Zurich, Switzerland
2676. Prof. Till Kleinebecker, Institute for Landscape Ecology and Resources Management (ILR), Research Centre for BioSystems, Land Use and Nutrition (ifZ), Justus Liebig University Giessen, Heinrich-Buff-Ring 26, 35392 Giessen, Germany
2677. Dr. Kristina Kleineidam, Justus Liebig University Giessen, Germany
2678. Dr. Fritz Kleinschroth, ETH Zürich, Switzerland
2679. Andris Klepers, Vidzeme University of Applied Sciences, Latvia
2680. Prof. Dr. Silja Klepp, Kiel University, Germany
2681. Dr. Florian KLETNY, FGES, Université Catholique de Lille, F-59000 Lille, France
2682. Prof. Michael Kleyer, University of Oldenburg, Germany
2683. Dr. Joanna Klime, Institute of Biochemistry and Biophysics Polish Academy of Sciences, Poland
2684. Prof. Dr. Christian Klinke, University of Rostock, Germany
2685. Dr. Edward Kluen, University of Helsinki, Finland
2686. Dr. Sjoerd Kluiving, Vrije Universiteit Amsterdam, Netherlands
2687. Dr. Alena Klaňová, Czech Society for Ornithology, European Bird Census Council, Czech Republic
2688. PhD Primož Kmecl, DOPPS BirdLife Slovenia, Slovenia
2689. Prof. Hanna Knita, Adam Mickiewicz University, Faculty of Biology, Poland
2690. M.Sc. Marvin Knapp, Heidelberg University, Germany
2691. Dr. Michal Knapp, Czech University of Life Sciences Prague, Czech Republic
2692. Dr. Sonja Knapp, Helmholtz-Centre for Environmental Research - UFZ, Germany
2693. Dr. Stefan Knauß, Martin Luther University Halle-Wittenberg, Halle, Germany, UFZ Helmholtz Centre for Environmental Research, Germany
2694. Dr. Saskia Knillmann, Environmental protection agency, Germany
2695. Prof. Dr. Peter Knipertz, Karlsruhe Institute of Technology, Germany
2696. Miriam Knödler, SLU Alnarp, Sweden
2697. Dr. Jürgen Knödlseder, IRAP, France
2698. Prof. Dr. Alexander Knohl, University of Göttingen, Germany
2699. Thomas Knura, biochemistry of thermophile organisms and elemental chemistry, Germany
2701. Prof. Dr. Bernhard Koch, University College of Teacher Education Tyrol, Austria
2702. Dr. Dieter Werner Koch, EcoStab - Soil-bio-engineering consultants, Germany
2703. M.Sc. Jakob Koch, Medical University of Innsbruck, Austria
2749. Dr. Teea Kortetmäki, University of Jyväskyla, Finland
2750. M.Sc. Anniek Kortleve, CML, Leiden University, Netherlands
2751. PhD Barbara Korwel-Łejkowska, University of Gdansk, Poland
2752. Dr. Martine Kos, Wageningen University, Netherlands
2753. Dr. Lutz Kosack, University of Bonn, Germany
2754. Dr. Sasa Kosanic, LJMU, United Kingdom
2755. Prof. Sarian Kosten, Radboud University, Netherlands
2756. M.Sc. Charlotte Koster, Wageningen University & Research, Netherlands
2757. Daniel Koster, Luxembourg Institute of Science and Technology, Germany
2758. Dr. Nils Köster, Botanic Garden Berlin, Freie Universität Berlin, Germany
2759. Dr. Vojtěch Kotecký, Charles University Environment Centre, Czech Republic
2760. Pia Kotschik, German Environment Agency, Germany
2761. M.Sc. David Kottelenberg, Wageningen University & Research, Netherlands
2762. PhD Tomas Koubek, Faculty of Science, Charles University in Prague, Czech Republic
2763. Prof. Demetrios Kouretas, University of Thessaly, Greece
2764. Helmut Kovac, Universität Graz, Austria
2765. Prof. Lubomir Kovac, Institute of Biology and Ecology, Faculty of Sciences, Pavol Jozef Safarik University, Kosice, Slovakia
2766. Prof. Vladimir Kováč, AQ-BIOS s.r.o., Slovakia
2767. Dr. Aniko Kovacs-Hostyanszki, Centre for Ecological Research, Institute of Ecology and Botany, Hungary
2768. Prof. Rafal Kowalczyk, Mammal Research Institute, Polish Academy of Sciences, Poland
2769. Dr. Vienna Kowallik, University of Freiburg, Germany
2770. Prof. Dr. Matthias Kowasch, University College of Teacher Education Styria, Austria
2771. Dr. Krystyna Kozioł, the Kazimierz Wielki University in Bydgoszcz, Poland
2772. Dr. Mikhail Kozlov, University of Turku, Finland
2773. Prof. Jan Kozlowski, Jagiellonian University, Poland
2774. Dr. Mariano KPATENON, Université de Montpellier, France
2775. Dr. MHS Kraak, University of Amsterdam, Netherlands
2776. Dr. Guido Kraemer, Uni Leipzig, Germany
2777. Dr. Yvan Kraepiel, Sorbonne Université, France
2778. Prof. Dr. Manfred Krafczyk, TU Braunschweig, Germany
2779. Dr. Gitte Kragh, Aarhus University, Denmark
2780. Prof. Dr. František Kráunec, Institute of Botany, Academy of Sciences of the Czech Republic, Czech Republic
2781. PhD Viktória Krájanová, Slovak National Museum - Natural History Museum, Slovakia
2782. Dr. Silvija Krajer Ostoić, Croatian Forest Research Institute, Croatia
2783. M.Sc. Nevena Kraljevic, Institute of Neuroscience and Medicine (INM-7: Brain and Behaviour), Research Centre Jülich, Germany
2784. Dr. Daniel Kramer, Michigan State University, United States
2785. M.Sc. Lilith Kramer, NIOO-KNAW, Netherlands
2786. Kerstin Kranich, Scientists for Future, Germany
2787. Dr. johanna kranz, Rheinland-Pfalz Kompetenzzentrum für Klimawandelfolgen, Germany
2788. Dr. Valentyna Krashevska, University Göttingen, Germany
2789. Prof. Dr. Harald Krause, University of Applied Sciences Rosenheim, Germany
2790. Prof. Dr. Jochen Krauss, Department of Animal Ecology and Tropical Biology, University of Würzburg, Germany
2791. Dr. Kinga Krauze, European Regional Centre for Ecohydrology PAN, Poland
2792. Dr. Pawel Kręż, Department of Tourism and Regional Studies Institute of Law, Economy and Administration Pedagogical University of Krakow, Poland
2793. Prof. Dr. Holger Kreft, University of Göttingen, Germany
Dr. Stefan Kreft, Policy Committee of the Society for Conservation Biology - Europe Section, Germany
Dr. Heidi Kreibich, GFZ German Research Centre for Geosciences, Germany
M.Sc. Jan Kreider, University of Groningen, Netherlands
Conor Kretsch, Cohab Initiative Secretariat, Ireland
M.Sc. Amelie Kreuzer, Agroscope, Switzerland
Prof. Dr. Jürgen Kreyling, University of Greifswald, Germany
M.Sc. Peter Kriegel, University of Würzburg, Germany
Dr. Marie-Therese Krieger, Technical University of Munich, Germany
Dr. Miloš Krist, Palacky University, Czech Republic
Dr. Jeppe Aagaard Kristensen, University of Oxford, United Kingdom
Dr. Kriton Kriton Grigorakis, Hellenic Centre for Marine Research, Greece
Prof. Emma Kritzberg, Lund University, Sweden
Dr. Mihá Krofel, University of Ljubljana, Biotechnical Faculty, Slovenia
PhD Ingvild Kroglund, Nord University, Norway
Juliana Krohn, University of Innsbruck, Austria
Prof. Dr. Helga Kromp-Kolb, University of Natural Resources and Life Sciences Vienna, Austria
Dr. Oliver Krone, Leibniz Institute for Zoo and Wildlife Research, Germany
Dr. Jakub Kronenberg, University of Lodz, Poland
M.Sc. Lisbeth Kronsted Lund, Norwegian School of Sport Science, Denmark
Prof. Dr. Christian Kropf, Natural History Museum and University of Bern, Switzerland, Switzerland
Prof. Dr. Markus Krötzsch, TU Dresden, Germany
M.Sc. Kenneth Kuba, Plant - Insect - Interactions, TUm School of Life Sciences, Technical University Munich, GER, Germany
PhD Maroš Kubala, VÚVH, Slovakia
Vojtěch Kubelka, University of South Bohemia, Czech Republic
Dr. Sylvain Kubicki, Luxembourg Institute of Science and Technology, Luxembourg
Dr. Ewa Kublik, Nencki Institute of Experimental Biology, Polish Academy of Sciences, Poland
Susanne Kublik, Helmholtz Munich, Germany
Prof. Michal Kucera, University of Bremen, Germany
Dr. Lechosław Kuczyński, Adam Mickiewicz University in Poznań, Poland
Prof. Dr. Tobias Kuemmerle, Humboldt-University Berlin, Germany
Dr. Mathias Kuenmerlen, Bundesamt für Naturschutz, Germany
Dr. Petra Kuenkel, Club of Rome, Collective Leadership Institute, Germany
Dr. Josefine Kuhlmann, Fachhochschule Burgenland, Austria
Dr. Jonas Kuhn, University of California, Los Angeles, Germany
M.Sc. Lukas Kuhn, Leuphana University Lüneburg, Germany
M.Sc. Elisabeth Kühn, Helmholtz-Centre for Environmental Research - UFZ, Germany
Prof. Dr. Ingolf Kühn, Helmholtz Centre for Environmental Research - UFZ, Germany
M.Sc. Paul Kühn, Friedrich-Schiller-University Jena, Germany
Dr. Steffen Kühner, Deutschland, Germany
Prof. Dries Kuipjer, Mammal Research Institute, Polish Academy of Sciences, Poland
Dr. Jan Kuiper, Stockholm Resilience Centre, Stockholm University, Sweden
Heini Kujala, Natural History Museum of Finland, University of Helsinki, Finland
M.Sc. Jonna Kukkonen, University of Turku, Finland
Dr. Sylwia Kulczyk, University of Warsaw, Poland
PhD Ryszard Kulik, Club of Ecological Thouhgnt, Poland
2841. Prof. Dr. Okan Külköylüoğlu, Bolu Abant İzzet Baysal University, Turkey
2842. Prof. Dr. Kalevi Kull, University of Tartu, Estonia
2843. PhD Bellis Kullman, retired, worked as the head of the department of mycology at the
    Estonian University of Life Sciences, Estonia
2844. Dr. Rohini Kumar, Helmholtz Centre for Environmental Research - UFZ, Germany
2845. Dr. Susanne Kummer, Research Institute of Organic Agriculture FiBL, Austria
2846. Prof. Vladimír Kunca, Technical University in Zvolen, Faculty of Ecology and
    Environmental Sciences, Slovakia
2847. PhD Eva Kündtová Klocová, Masaryk University, Czech Republic
2848. PhD Jan Kunnas, University of Oulu, Finland
2849. Dr. Annika Künne, Geographic Information Science Group, Institute of Geography,
    Friedrich Schiller University Jena, Jena, Germany
2850. M.Sc. Sven Künnecke, German Aerospace Center (DLR), Germany
2851. Dr. Anne Kupczok, Wageningen University & Research, Netherlands
2852. Dr. Benjamin Kupilas, Norwegian Institute for Water Research (NIVA); University
    of Münster, Institute of Landscape Ecology, Chair for Applied Landscape Ecology and
    Ecological Planning, Germany
2853. Dr. Konstantin Kuppe, Umweltbundesamt, Germany
2854. Dr. Denis Kupsch, Dept. Conservation Biology, University of Göttingen, Germany
2855. Prof. Olavi Kurina, Estonian University of Life Sciences, Estonia
2856. Prof. Dr. Alexander Kurz, Chapman University, USA
2857. Dr. Miroslav Kutil, Mendel University in Brno, Czech Republic
2858. Dr. Mikko Kuussaari, Finnish Environment Institute, Finland
2859. Prof. Dr. Thomas Kuyper, Wageningen University, Netherlands
2860. M.Sc. Iga Kwiatkowska, University of Warsaw, Poland
2861. Prof. Dr. Caterina La Porta, University of Milan, Italy
2862. M.Sc. Ossi Laaksamo, University of Jyväskylä, Finland
2863. Prof. Lauri Laanisto, Estonian University of Life Sciences, Estonia
2864. PhD Frederic LABAT, Aquabio, France
2865. Joël Labbé, Other, France
2866. Prof. Pierrick Labbé, University of Montpellier, France
2867. Dr. Juozas Labokas, Gamtos tyrimų centras, Lithuania
2868. Dr. Jacques Labonne, INRAE, France
2869. M.Sc. Marvin Labouré, University of Namur, Belgium
2870. M.Sc. Ricardo Lacerda, CIIMAR, Portugal
2871. Dr. Susanne Lachmuth, University of Maryland Center for Environmental Science,
    United States
2872. PhD Vincent Lacroix, Université Claude Bernard Lyon 1, France
2873. Dr. Steven Lade, Stockholm University, Sweden
2874. PhD Vincent Laderrière, CNRS, France
2875. Dr. Pascal Laffargue, IFREMER DECOD, France
2876. Prof. Isabelle Laffont-Schwob, LPED, Aix-Marseille Université, OSU PYTHEAS,
    France
2877. Dr. Franck Lagarde, Ifremer, France
2878. M.Sc. Elsa Lagerquist, Swedish University of Agricultural Sciences, Sweden
2879. Dr. Claire Lagesse, University of Franche-Comté, France
2880. Dr. Anastasia Lagagis, Aristotle University of Thessaloniki, Greece
2881. Dr. Emilio Laguna, University of Valencia, Spain
2882. Dr. Stefanie Lahaye, Universiteit Antwerpen, Belgium
2883. Stewart Laing, University of Edinburgh, United Kingdom
2884. M.Sc. Tamás Lakatos, Centre for Ecological Research, Hungary
2885. Dr. Hanna-Kaisa Lakka, University of Jyväskylä, Finland
2886. M.Sc. Lucas Lalande, Université Claude Bernard Lyon 1, France
2887. Dr. Cecilia Laggis, Aristotle University of Thessaloniki, Greece
2888. Dr. Jens N. Lallensack, Universidade Federal de Minas Gerais, Germany
2889. Carles Lalueza-Fox, Natural Sciences Museum of Barcelona, Spain
2890. PhD Carla Lamberti, University of Milan, Italy
2891. PhD Sam Lambrechts, Ghent University and The Research Institute for Nature and Forest (INBO), Belgium
2892. Prof. Dr. Claus Lamm, University of Vienna, Austria, Austria
2893. PhD Eveline-Marie Lammens, KU Leuven, Belgium
2894. PhD Leni Lammens, UGent, Belgium
2895. Dr. Mark Lammers, University of Münster, Germany
2896. Marcos Lana, Swedish University of Agricultural Sciences, Sweden
2897. Dr. Noemi Lana-Renault, University of La Rioja, Spain
2898. M.Sc. Jan Landert, Research Institute for Organic Agriculture FiBL, Switzerland
2899. M.Sc. Tess Landon, Zentrum für Soziale Innovation, Austria
2900. Dr. Hakan Lane, JGU, Germany
2901. M.Sc. Peter Laner, Euraq Research - Institute for Regional Development, Italy
2902. Dr. Elke Lang, Pensioner; DSMZ Braunschweig, Germany
2903. M.Sc. Thomas Langbehn, Nature and Biodiversity Conservation Union Germany
2904. M.Sc. Lars Langer, Leipzig University, Germany
2905. Dr. Günter Langergraber, Universität für Bodenkultur Wien, Austria
2906. Dr. Simone Daniela Langhans, NIVA - Norwegian Institute for Water Research, Norway
2907. Prof. Dr. Estelle Langlois, University of Rouen, France
2908. Dr. Robert Langner, Heinrich Heine University Düsseldorf, Germany
2909. Dr. Maureen Lankhuizen, VU Amsterdam, Netherlands
2910. PhD Kaire Lanno, Estonian University of Life Sciences, Estonia
2911. Dr. oriol lapiedra, CREAF, Spain
2912. Dr. Eva Laplace, Heidelberg Institute for Theoretical Studies, Germany
2913. M.Sc. Christophe Laplace-Treyture, INRAE Nouvelle Aquitaine, centre de Bordeaux, France
2914. Dany Lapostolle, Assistant Professor, France
2915. PhD Angela Lara García, Universidad de Sevilla, Spain
2916. PhD Angela Lara-García, University of Seville, Spain
2917. Prof. Catherine Laroche Dupraz, Institut Agro, France
2918. Dr. Aitor Larrañaga, University of the Basque Country (UPV/EHU), Spain
2919. Dr. BEATRIZ LARRAZ, UNIVERSIDAD DE CASTILLA-LA MANCHA, Spain
2920. M.Sc. Jesper Kyed Larsen, Renewables, United Kingdom
2921. M.Sc. Mathias Larsen, Copenhagen Business School, Denmark
2922. Dr. Stefano Larsen, Fondazione Edmund Mach, Italy
2923. PhD Keith Larson, Umeå University, Sweden
2924. Prof. Grażyna Laska, Department of Agri-Food Engineering and Environmental Management, Białystok University of Technology, Wiejska 45E Street, 15-351 Białystok, Poland, Poland
2925. Prof. Ryszard Laskowski, Institute of Environmental Sciences, Jagiellonian University in Kraków, Poland
2926. Dr. Géraldine Lassalle, INRAE, France
2927. Dr. Malwenn LASSUDRIE, Ifremer, France
2928. Dr. Guillaume Latombe, University of Edinburgh, United Kingdom
2929. Dr. Matteo Lattuada, TU Braunschweig, Germany
2930. Dr. Marie Launay, INRAE, France
2931. PhD Marilyne Laurans, CIRAD, France
2932. PhD Léa Laurent, Laboratoire Biogéosciences, université de Bourgogne, Dijon, France
2933. M.Sc. Nicolas Laurent, Royal Belgian Institute of Natural Sciences, Belgium
2934. Dr. Thea Lautenschläger, Botanical Garden Hamburg, Germany
2935. Dr. Jörn Lauterjung, Retired, Germany
2936. Dr. Claire Lauvernet, INRAE, France
2937. Dr. Amelie Laux, Georg-August University of Göttingen, Johann Friedrich Blumenbach Institute of Zoology and Anthropology, Conservation Biology, Germany
2938. Dr. christine lauzeral, University Toulouse III, France
2939. Dr. Claire Lavigne, INRAE, France
2940. Dr. Philippe Lavigne Delville, Institut de recherche pour le développement (IRD), France
2941. Dr. Sandra Lavorel, CNRS, France
2942. Dr. Colin Lawton, University of Galway, Ireland
2943. M.Sc. Lucia Layritz, TUM, Germany
2944. Prof. MARIA LAZARIDOU, ARISTOTLE UNIVERSITY, Greece
2945. M.Sc. Giacomo Lazzeri, University of Florence, Italy
2946. Dr. Dewi Le Bars, KNMI, Netherlands
2947. PhD Marjorie Le Bars, Institut de Recherche pour le Développement -IRD, France
2948. Dr. Christine LE BAS, INRAE, France
2949. Prof. Jacques Le Cacheux, University of Pau (UPPA), and Ponts Paris Tech, France
2950. Dr. Goneri Le Cozannet, BRGM, France
2951. Dr. Jean-François Le Galliard, CNRS, France
2952. M.Sc. Rozenn Le Net, VetAgro Sup, France
2953. PhD Coline Le Noir de Carlan, University of Antwerp, Belgium
2954. PhD Céline LE PICHON, INRAE, France
2955. Prof. Géraldine Le Roux, Université de Brest, France
2956. Dr. Renan Le Roux, INRAE, France
2957. Elodie Le Souchu, University of Orléans, France
2958. Dr. Isabelle Le Viol, Museum National d’Histoire Naturelle, France
2959. Dr. Paul Leadley, Paris-Saclay University, France
2960. PhD Sheila Leal, Tragsatec S.A., Spain
2961. Thomas Lebard, Independant, France
2962. Dr. Roxanne Leberger, CREAF, Spain
2963. Dr. Antoine Leblois, INRAE, France
2964. Dr. Raphael LEBLOIS, INRAE, France
2965. Dr. Christophe Leboulanger, Institut de Recherche pour le Développement, France
2966. Dr. Gernto Lechner, University of Graz, Austria
2967. PhD Camille Leclerc, INRAE, France
2968. Dr. David Leclere, IIASA, Austria
2969. Prof. Odile Lecompte, University of Strasbourg, France
2970. Dr. Thierry LECOMTE, Conseil Scientifique Régional du Patrimoine Naturel (chairman), France
2971. PhD Anjélïca Leconte, INRAE Versailles, France
2972. Dr. Lou Lecuyer, CNRS, France
2973. Prof. Dr. Tosso Leeb, University of Bern, Switzerland
2974. Prof. Dr. Florian Leese, University of Duisburg-Essen, Germany
2975. Dr. François Lefèvre, INRAE, France
2976. Stefan Leinaer, Austrian Association for Floristic Research, Austria
2977. Prof. Dr. Vincent Legrand, Université catholique de Louvain (UCLouvain), Belgium
2978. M.Sc. Aija Lehikoinen, Finnish Environment Institute, Finland
2979. Dr. Aleks Lehikoinen, Finnish Museum of Natural History, University of Helsinki, Finland
2980. PhD Esa Lehikoinen, University of Turku, Finland
2981. Dr. Petteri Lehikoinen, Finnish Museum of Natural History, University of Helsinki, Finland
2982. Dr. Stephan Lehmann, STATTwerke e.V., Germany
Dr. Florian Lehmer, Institute for Employment Research (IAB), Germany
M.Sc. Sebastian Lehmler, LUP GmbH, Germany
PhD Carl Lehto, Swedish University of Agricultural Sciences, Sweden
PhD Anna Lehtonen, University of Jyväskylä, Finnish Institute for Educational Research, Finland
Dr. Sonja Leidenberger, University of Skövde, Sweden
PhD Christopher Leifsson, Technical University of Munich, Germany

3939. PhD Eleni Papadatou, Freelancer, United Kingdom
3940. Prof. Cristina Papa, Università di Perugia, Italy
3941. Dr. Dimitrios-Charalampos Papaoannou, University of Ioannina, Greece
3942. Dr. Nikos Papandroulakis, Hellenic Center for Marine Research, Greece
3943. Prof. Tobias Pape Thomsen, Roskilde University, Department of People and Technology, Denmark
3944. Prof. Mauro Papini, Università di Firenze, Italy
3945. PhD Minna Pappila, Finnish Nature Panel, Finland
3946. Dr. Daciana Papura, Bordeaux Sciences Agro, France
3947. Dr. Jean-Yves Paquet, Natagora, Department of Studies, Belgium
3948. Catherine Paradeise, Université Gustave Eiffel. Lisis, France
3949. Petr Pařil, Masaryk University, Faculty of Science, Brno, Czech Republic
3950. Dr. Josephine Paris, Marche Polytechnic University, Italy
3951. Dr. Mathilde PARIS, CNRS, France
3952. M.Sc. Camille Parise, INRAE, France
3953. M.Sc. Andrea Parisi, ATU, Ireland
3954. Prof. Louisa Parks, University of Trento, Italy
3955. Prof. Aristeidis Parmakelis, National and Kapodistrian University of Athens, Greece
3956. Dr. Koen Parmentier, RBINS, Belgium
3957. Dr. Marie-Laure Parmentier, Inserm, France
3958. Prof. Dr. Richard Parncutt, University of Graz, Austria
3959. Prof. Marco Parolini, University of Milan, Italy
3960. M.Sc. Aida Parres Lluch, Institute of Nature Conservation, Polish Academy of Sciences, Poland
3961. M.Sc. Chiara Parretta, University of Trento, Italy
3962. PhD Katie Parsons, University of Hull, United Kingdom
3963. Jaak Pärtel, University of Tartu, Estonia
3964. Prof. Meelis Pärtel, University of Tartu, Estonia
3965. Dr. Georg Partzsch, private company, Austria
3966. Prof. Lucian Parvulescu, West University of Timisoara, Romania
3967. Prof. Dr. Unai Pascual, Basque Centre for Climate Changr (BC3), Spain
3968. M.Sc. Diana Pascual Sanchez, CREAF, Spain
3969. Prof. Dr. Frank Pasmans, Ghent University, Belgium
3970. M.Sc. Alberto Pastorino, Mont Avic Regional Park, Italy
3971. Dr. György Pataki, Environmental Social Science Research Group, Hungary
3972. Prof. Kristiina Patja, University of Helsinki, Finland
3973. Dr. Bharat Bhusan Patnaik, Fakir Mohan University, India
3974. PhD Nicolas Patris, Institut de Recherche pour le Développement, France
3975. PhD Rashmi Paudel, Phd Student, Germany
3976. Dr. Carsten Paul, Leibniz Centre for Agricultural Landscape Research (ZALF), Germany
3977. Prof. Dr. Stephan Pauli, Technical University of Munich, Germany
3978. Prof. Dr. Yves-Marie PAULET, UBO Université de Bretagne Occidentale, France
3979. Prof. Dr. Laura Paullette, University of Agricultural Sciences and Veterinary Medicine, Romania
3980. Dr. Markus Pauli, Dublin City University, Ireland
3981. Prof. Dr. Christian Paulik, Johannes Kepler University, Austria
3982. PhD Ferran Pauné, Universitat de Vic, Spain
3983. Prof. Dr. Juli Pausas, CIDE, CSIC, Spain
3984. Dr. Ine Pauwels, Research Institute for Nature and Forest, Belgium
Maurizio Pavesi, Museo di Storia Naturale, Milano, Italy
Dr. Martina Pavlek, Rudjer Boskovic Institute, Croatia
Dr. Christoferos Pavlou, Cyprus University of Technology, Cyprus
Prof. Sandrine Pavoine, Museum National d'Histoire Naturelle, Paris, France
PhD Julia Pawlak, University of Potsdam, Germany
Prof. Dr. Robert Paxton, Martin-Luther-Universität Halle-Wittenberg, Germany
M.Sc. Robin Payne, Instituto Superior de Agronomía, University of Lisbon, Portugal
Dr. Sabine Payr, Austrian Research Institute for Artificial Intelligence OFAI, Austria
Prof. Bernard PAYRASTRE, University of Toulouse 3, France
Prof. Sylvain Payraudeau, ENGEES - ITES, France
Dr. Jana Pazdirkova, Masaryk University Brno, Czech Republic
Dr. Robert Pavur, Institute of Geography SAS, Slovakia
PhD Elena Pearce, Aarhus University, Denmark
Prof. Dr. Alice Pechriggl, University of Klagenfurt, Austria
PhD Christian Pedersen, Norwegian Institute of Bioeconomy Research, Norway
PhD Pil Pedersen, Aarhus University, Denmark
M.Sc. Arne Pellas, KU Leuven, Belgium
Prof. Dr. Alain Peeters, Agroecology Europe, Belgium
Dr. Mirko Pegoraro, Liverpool John Moores University, United Kingdom
Dr. Raphaëlle Péguilhan, IPREM UMR5254 - UPPA/CNRS, France
PhD Julie Peiffer, Ineris, France
Prof. Dr. Ursul Peintner, University Innsbruck, Austria
Prof. christophe Pelabon, NTNU, Norway
PhD Sara Pelaez Sanchez, University of Limerick, Ireland
M.Sc. Mathieu Pélissié, ISEM, Université de Montpellier, France
Prof. Natalia Simona Pellegata, University of Pavia, Italy
PhD Irene Pellegrino, University of Piemonte Orientale, Italy
Dr. Manuel PELLETIER, LIEC CNRS, France
Prof. Giuseppina Pellizzari, università degli sudi di Padova Italt, Italy
Prof. Dr. celine pelosi, inrae, France
Prof. Dr. Marielos Peña Claros, Wageningen University & Research, Netherlands
Dr. Francisco J. Peñas, IHCantabria, Spain
Prof. Dr. Jose Matias Peñas Castejon, UNIVERSITÉ DE LIMOGES. FACULTÉ DES SCIENCES. LABORATOIRE E2LIM. RECHERCHE DE EAU ET ENVIRONNEMENT, France
Prof. Julio Peñas de Giles, University of Granada, Spain
Dr. Mariya Peneva, UNWE, Bulgaria
M.Sc. Alexandra Penicka-Arndt, University of Natural Resources and Life Sciences, Vienna, Austria
Dr. Marcin Penk, University College Dublin, Ireland, Ireland
Prof. Dr. Marianne Penker, BOKU - University of Natural Resources and Life Sciences, Austria
Dr. Frank Pennekamp, University of Zurich, Switzerland
Dr. Ellis Penning, Deltares, Netherlands
Dr. Caterina Penone, University of Bern, Switzerland
Dr. zephyr penoyre, leiden observatory, Netherlands
PhD Giancarlo Pepponi, Fondazione Bruno Kessler, Italy
M.Sc. André Peredi Arce, Atlantic Technological University - Galway, Ireland
Dr. Joana Pereira, University of Aveiro, Portugal
Prof. Paulo Pereira, Mykolas Romeris University, Lithuania
Pedro Pereira, Universidade de Evora, Portugal
PhD Tânia Pereira, Interdisciplinary Centre of Marine and Environmental Research, Portugal

M.Sc. Matis Toitot, University of Montpellier, France

Dr. Andrew Tongue, Mott MacDonald, United Kingdom
Dr. Alexandra Tomaselli, Eurac Research, Italy
PhD Sabrina Tomasini, Independent consultant, Italy
M.Sc. Tsvetelina Tomova, ZALF, Germany

Dr. Andrew Tongue, Mott MacDonald, United Kingdom
Dr. Roos Toorop, Wageningen University & Research, Netherlands
PhD Faranak Tootoonchi, PostDoc at SLU, Sweden
PhD Jano Topercer, Independent researcher, Slovakia
PhD Ira Toplicanec, Faculty of Veterinary Medicine, Croatia
M.Sc. Jonas Torfs, University of Antwerp, Belgium
Dr. Rubén Torices, King Juan Carlos University, Spain
Prof. Dr. GREGOR TORKAR, UNIVERSITY OF LJUBLJANA FACULTY OF EDUCATION, Slovenia
Dr. Thierry Tormos, OFB, France
Dr. Diarmuid Torney, Dublin City University, Ireland
M.Sc. Manuel Toro Velasco, Centro de Estudios Hidrográficos del CEDEX, Spain
Dr. Edina Török, entre for Ecological Research, Hungary
PhD Katalin Török, Centre for Ecological REsearch, Hungary
M.Sc. Laura Torrent, BiBio Research Group, Spain
Dr. Aurora Torres, Universidad de Alicante, Spain
Prof. Antonio Torroni, Università di Pavia, Italy
Dr. Andreas Toschki, gaiac Research Institute, Germany
Prof. Dr. Jale Tosun, Heidelberg University, Germany
PhD Judit Tóth, University of Szeged, Hungary
Dr. Viktor Tóth, Balaton Limnological Research Institute, Hungary
PhD Zsófia Tóth, Biology Department, Lund University, Sweden
Dr. Christian Tötzke, University of Potsdam, Germany
Leanne Tough, Wildfowl & Wetlands Trust, United Kingdom
PhD Marie Toussaint, French National Research Institute for Sustainable Development, France
M.Sc. Axel Touw, IGZ Leibniz Institute of Vegetable and Ornamental Crops, Germany
PhD Frederic Touzalin, University College Dublin, Ireland
Prof. Dr. Juan Traba, Department of Ecology, Universidad Autónoma de Madrid, Spain
Dr. Jean Trap, IRD, France
Anne Trapp, Leuphana University, Germany
Michaela Trapp, CureVac, Germany
M.Sc. Fee Trau, Julius Kühn-Institut, Germany
M.Sc. Wolfgang Traylor, Senckenberg Biodiversity and Climate Research Centre, Germany
Dr. Łukasz Trębicki, University of Lodz, Poland
Dr. Ewelina Trela, Reproductive Biology Group, Department of Embryology, Institute of Developmental Biology and Biomedical Sciences, Faculty of Biology, University of Warsaw, Poland
Prof. Dr. Pasquale Trematerra, University of Molise, Campobasso, Italy, Italy
Prof. Dr. Jörg Tremmel, Universitä Tübingen, Germany
Prof. Paolo Carlo Maria Tremolada, University of Milan, Italy
PhD Gabriele Trespidi, University of Pavia, Italy
M.Sc. Hanna Treu, BÖLW, Germany
Prof. Dr. Andreas Tribsch, University of Salzburg, Department of Environment and Biodiversity, Austria
Dr. Dagmar Triebel, Bavarian State Collections - SNSB, Germany
Prof. Xenia Trier, University of Copenhagen, Denmark
M.Sc. Varvara Trigou, Forester - Environmentalist MSc, Greece
Prof. Dr. Fritz Trillmich, University of Bielefeld, Germany
PhD Antonella Trisorio, Council for Agricultural Research and Agricultural Economic Analysis (CREA), Italy
Dr. Maria Triviño, University of Jyväskylä, Finland
Oldrich Trneny, Agricultural research Ltd., Czech Republic
Dr. Stefan Trogisch, Martin Luther University Halle-Wittenberg, Germany
Prof. Dr. Peter Trontelj, University of Ljubljana, Slovenia
PhD Tineke Troost, Deltares, P.O. Box 177, 2600, MH Delft, The Netherlands, Netherlands
Dr. Bénédicte Trouiller, INERIS, France
Prof. Dr. Arie Trouwborst, Tilburg University, Netherlands
Dr. Amélie Truchy, Swedish University of Agricultural Sciences, Sweden
Dr. Minh-Xuan Truong, Swedish University of Agricultural Sciences, Sweden
Dr. Konstantinos Tsagarakis, Hellenic Centre for Marine Research, Greece
Dr. EVI TSAKIRI, AROSTOTLE UNIVERSITY OF THESSALONIKI, GREECE, Greece
PhD Catherine Tsangaris, Hellenic Centre for Marine Research, Greece
PhD Dimitris Tsaparis, Hellenic Centre for Marine Research, Intitute of Marine Biology, Biotechnology & Aquaculture, Greece
Prof. Dr. Teja Tscharntke, Agroecology, University of Göttingen, Germany
Prof. Dr. Thomas Tschuein, University of the Aegean, Greece
Dr. Okka Tschöpe, Dahlem Seed Bank, Botanica Garden Berlin, FU Berlin, Germany
PhD Emanuel Tschopp, Universität Hamburg, Germany
Dr. Matthias Tschumi, Swiss Ornithological Institute, Switzerland
Dr. RIGAS TSIAKIRIS, IEROLOXITON 21, IOANNINA, Greece
PhD Costas Tsigenopoulos, Hellenic Centre for Marine Research (HCMR), Greece
Prof. Athanassios Tsikliras, Aristotle University of Thessaloniki, Greece
M.Sc. Nikolaos Tsiopelas, Hellenic Ornithological Society, Greece
Prof. Haralabos Tsolakis, University of Palermo, Department of Agricultural, Food and Forest Sciences, Italy
Ivaylo Tsvetkov, Forest Research Institute, Sofia, Bulgaria
M.Sc. Laura Tuominen, University of Turku, Finland
Prof. Hanna Tuomisto, University of Turku, Finland
Dr. Anne Turbe, Ecoscope, Israel
Dr. Ingrid Turisová, Matej Bel University in Banska Bystrica, Slovakia
M.Sc. Guillhem Türk, Luxembourg Institute for Science and Technology, Luxembourg
Dr. Jonathan Turner, UCD, Ireland
Prof. Miles Turner, Dublin City University, Ireland
Prof. Esther Turnhout, University of Twente, Netherlands
Dr. Topi Turunen, Finnish Environment Institute Syke, Finland
Dr. Joanna Tuomisaari, University of Jyväskylä, Finland
M.Sc. Nikolaos Tsiopoulos, Hellenic Ornithological Society, Greece
Prof. Dr. Rossen Tzonev, Sofia University "St. Kliment Ohridski", Faculty of Biology, Department of ecology and environmental protection, 8 Dragan Tsankov Blvd., Sofia 1164, Bulgaria
Dr. Olga Tzortzakaki, University of Ioannina, Greece
Dr. Eve Udino, Max Planck Institute for Biological Intelligence, Germany
PhD Kevin Ugwu, University of Las Palmas of Gran Canaria, Spain
Dr. Wiebe Vollmann, University of Potsdam, Germany
Dr. René Ulrich, TU Dresden, Germany
Dr. Susann Ulrich, Universität Bonn, Germany
Dr. MiŁos Ulman, Czech University of Life Sciences Prague, Czech Republic
Dr. Anne Ulrich, Forstliche Versuchs- und Forschungsanstalt Baden-Württemberg, Germany
M.Sc. Josephine Ulrich, FSU Jena, Germany
Dr. Ciska Ulug, Vrije Universiteit Amsterdam, Netherlands
Dr. Wajid Umar, Leibniz Institute of Agricultural Engineering and Bioeconomy, Germany
Prof. Leslie Underhill, University of Cape Town, South Africa
Dr. Malin Undin, MIUN, Sweden
Dr. Fabrizio Ungaro, National Research Council - Institute of BioEconomy, Italy
Prof. Thomas Unger, University College Dublin, Ireland
Dr. Elisabeth Unterfrauner, Zentrum für Soziale Innovation GmbH, Austria
Dr. Maria Unterköfler, Vetmeduni Vienna, Austria
Dr. Simon Unterstrasser, DLR Oberpfaffenhofen, Germany
Benjamin Unzelmann, Freie Universität Berlin, Germany
Dr. Domas Uogintas, Nature Research Centre, Lithuania
Prof. Dr. Anna Urbanowicz, Polish Academy of Sciences, Poland
Dr. Arkadiusz Urbański, Adam Mickiewicz University, Poland
Dr. Sigita Urdze, Kreisstadt Dietzenbach, Germany
Dr. Léa Uroy, University of Rennes, France
Prof. Zbigniew Ustrnul, Jagiellonian University / IMWM, Poland
Dr. Bálint Üveges, Bangor University, Bangor, Wales, United Kingdom, Hungary
Dr. Vladimir Uvira, Faculty of Science, Palacky University of Olomouc, Czech Republic
Prof. Eliza Uzunova, Sofia University "St. Kliment Ohridski", Bulgaria
Dr. Tania V. Fernandes, Netherlands Institute of Ecology (NIOO-KNAW), Netherlands
PhD Radovan Václav, Slovak Academy of Sciences, Slovakia
Dr. Csaba Vad, Centre For Ecological Research, Hungary
Prof. Dr. ANGHELUTA VADINEANU, Systems Ecology and Sustainability /University of Bucharest, Romania
Dr. Anna-Maria Vafetadou, Ghent University, Belgium
PhD Balázs Vági, University of Debrecen, Hungary
Dr. Varpu Vahtera, University of Turku, Finland
M.Sc. Tuomas Väisänen, University of Helsinki, Finland
PhD Anne-Charlotte VAISSIÈRE, CNRS, France
Dr. Bernard Vaissière, INRAE, France
Vasilis Valavanis, Hellenic Center for Marine Research, Greece
PhD Cândida G. Vale, CIIMAR, Portugal
Dr. Paola Valentini, University College Dublin, Ireland
Dr. Francisco Valera, Estación Experimental de Zonas Aridas (Consejo Superior de Investigaciones Científicas), Spain
PhD Francesco Valerio, BIOPOLIS, Portugal
